

[Table Of Contents](#)

**Preface**

**Introduction**

**Chapter 1: History**

Carburetor Numbering

**Chapter 2: How Quadrajets Work**

Main Components

Venting

Fuel Inlet

Float

Idle System

Primary Main Metering System

Secondary System

Choke System

**Chapter 3: Selecting the Right Carb**

What Are the “Best” Quadrajets?

Inlet Position

CFM

Linkage

Vacuum Fittings

Choke Pull-Offs

“Remanufactured” Quadrajets

What Quadrajet Do I Use?

**Chapter 4: Tools and Safety**

Safety Equipment

A Place to Work

Basic Hand Tools

Drill Bits

Sand/Media Blasting

Air Tools

Propane Torch/Oxygen Acetylene Welder

Carburetor Cleaners and Solvents

“Special Tools”

Measuring Devices

## **Chapter 5: Rebuilding the Carb**

Bottom Plugs

Warped Air Horn/Main Body

Stripped Fuel Filter Housing Threads

Loose Throttle Shafts

Taking the Carburetor Apart

Cleaning the Parts

Base Plate

Air Horn

Rebuild Kits

## **Chapter 6: High-Performance Modifications**

Base Plate Modifications

Modifying the Idle System

Primary Main Fuel System

Basic Rules for Primary Jetting

Power Piston Springs

Accelerator Pump

Fuel Inlet Seats

Floats

Pullover Enrichment System

Secondary Emulsion Tubes (Air Bleeds)

Secondary Air Flaps, Shaft, Hanger, and Metering Rods

Choke Pull-Offs

Recipe for Success

Full-Race Carburetors

Removing the Primary Booster Rings

## **Chapter 7: Edelbrock Q-jets**

### **Appendix A: Quadrajet Secondary Metering Rods**

### **Appendix B: Quadrajet Components**
