About the Author

Acknowledgments

Chapter 1: Getting Started

Setting Up Shop

Tools

Measurement Tools

Chapter 2: Block Preparation and Machining

The Engine

Block Choices

Identifying Core Shift

Installing Freeze Plugs

Boring the Cam Tunnel

Decking the Block

Boring the Cylinders

Boring the Lifter Bores

Stress Relieving the Block

Final Honing

Cleaning

Polish the Oil Galleries

Final Checks

Chapter 3: Short Block Assembly

Crankshaft Considerations

Connecting Rods

Working with Rod/Stroke Ratios

Rod Prep

Rod Bolt Stretch

Pistons

Balancing

Balance Versus Overbalance

Piston Rings

Installing the Crank

Rod and Piston Assembly

Chapter 4: Cylinder Heads and the Valvetrain

Cylinder Head Machine Work

Decking

Valveguides

Spring Seats

Screw-In Rocker Studs

Valve Seats

Valvespring Seat Versus Nose Pressures

Adjusting Spring Pressures

Valvespring Coil Bind

Installing the Cam Bearings

Installing the Cam

Determining Pushrod Length

Camshaft Timing

Intake Centerline Method

Finding Piston TDC

Measuring Valve Movement

Piston-to-Valve Clearance

Chapter 5: Street Stock Engine Build

The Block

Rotating Assembly

Cylinder Heads and Valvetrain

Ignition

The Spec Sheet

Chapter 6: NASCAR Late Model Stock Engine Build

The Block

Rotating Assembly

Cylinder Heads and Valvetrain

Oiling

The Spec Sheet

Chapter 7: Dirt Late Model Engine Build

The Block

Rotating Assembly

Valvetrain

Ignition

The Spec Sheet

Chapter 8: Break-in, Regular Maintenance and Teardown

Break-In

Regular Maintenance

Teardown and Rebuild

Engine Build Sheet
