

[Table Of Contents](#)

**About the Author**

**Acknowledgments**

**Introduction**

**Special Interview with Tom Hoover**

**Chapter 1 A Brief History of the Hemi Engine**

First-Generation Hemis 1951–1958

The Chrysler 331 and 354

The 392

The End of Early Hemis

**Chapter 2 Engine Blocks**

The Second-Generation 426 Hemi

2008 Mopar Hemi Block Part Numbers

Block Improvements

Aluminum Blocks

Special Blocks

**Chapter 3 The Rotating Assembly**

Cast Crankshafts

Forged OEM Crankshafts

Aftermarket Crankshafts

Crankshaft Stroke

Compression Height

Special Finish Work

Recommendations

Crankshaft Journal Size

Magnafluxing

Balancing

Connecting Rods

Aluminum vs. Steel Rods

Pin Size

Pistons

## **Chapter 4 Bearings**

Coatings

Main Bearings

Rod Bearings

Bearing Technical Information

## **Chapter 5 Heads**

Valve Arrangement

Typical Flow Numbers

Iron or Aluminum Heads?

Port Height and Location

Intake and Exhaust Bolt Patterns

Rocker Arm Considerations

Racing Considerations

Head Components

Springs

Head Preparation Sequence

## **Chapter 6 Valvetrain**

The Camshaft

Terminology and the Cam Card

Degreeing a Camshaft

Types of Cams

Special Camshaft Considerations

The Cam Drive

Pushrods

The Rocker System

Indy Cylinder Heads

Rocker Arms

## **Chapter 7 Lubrication System**

Chrysler Hemi Oiling System

Some Technical Comments

Modifications and Improvements to the Oiling System

Block Modifications

## **Chapter 8 Induction System**

Some Induction Basics

Types of Manifolds and Recommendations

Forced Induction

Carburetors

Fuel Types

Fuel Injection

Electronic Fuel Injection (EFI)

## **Chapter 9 Ignition System**

Intermediate Shaft and Bushing

Set the TDC Mark

Hemi Ignition Basics

RPM-Based Mechanical Advance

Load-Based Advance

Rotor Phasing

Effects of Timing on Power

Types of Ignition

Magnetos

Coils

Types of Distributors

Modifying Distributors

Spark Plug Tubes, Wires and Spark Plugs

## **Chapter 10 Cooling and Exhaust Systems**

The Cooling System

The Exhaust System

## **Chapter 11 Power Adders**

Nitrous Oxide

Turbocharging

Power Adder Summary

## **Chapter 12 Machining and Assembly**

The Blueprinting Sheet

Choosing the Parts

Engine Machining

Machining the Rotating Assembly

Machining the Block

Head Machining and Head Assembly

Engine Assembly

## **Chapter 13 Engine Combinations**

Crate Hemi

Stock Street Hemi with Quiet Valvetrain

Normally Aspirated Hot Street Stroker Hemi

Normally Aspirated Hot Street Stroker Hemi with EFI

Supercharged Street Hem

Race Hemi for Bracket Racing

Race Hemi for Top Sportsman Racing

Outlaw Race Hemi

Engine Combination Summary

## **Chapter 14 On the Dyno**

## **Appendix**

## **Source Guide**
