Acknowledgments

Introduction

Chapter 1:

General Front End Geometry

Standard Definitions

Front Suspension Relationships

Bump Steer

SLA vs. Strut

SLA Suspension Fixes

Chapter 2:

General Rear Suspension Geometry

Rear Suspension

Relationships

Leaf-Spring/Hotchkiss Suspensions

Four-Link Suspensions

Torque Arm Suspensions

Three-Link Suspensions

Ladder-Bar Suspensions

Truck-Arm Suspensions

Lateral Axle Locators

Solid Axle vs. IRS Suspensions

Chapter 3:

Springs, Rates and Shocks

Springs

Ride Height

Spring Rate

Air Springs

Shock Absorber Technology

Coil-Over vs. Coil Spring

Chapter 4:

Aftermarket Arms

Metal Matters

Design Development

Tubular Lower A-Arms

Bushings

Chapter 5:

Sway Bars

Basics of Function

Learn What You Need

Selection Tips

Adaptation Options

Rear Bars

End Links

Heim?Joints

Splined Bars

Quality Matters

Chapter 6:

Wheels and Tires

General Tire Behavior

Wheel Diameter

Tire Selection

Chapter 7:

Total Package

Chassis Stiffness

Chapter 8:

GM Muscle Cars

GM A-Body

GM G-Body 1981 to 1988

GM First-Generation F-Body

GM Second-Generation F-Body

GM Third-Generation F-Body

Chapter 9:

Ford Muscle Cars 123

Front Suspension Options 123

Rear Suspension Options 128

Ford Fox Body 1974 to 1978 131

Ford Fox Body 1979 to 1993 132

Chapter 10:

Mopar Muscle Cars

Front Suspension

Rear Suspension
