

[Table Of Contents](#)

**Dedication**

**Acknowledgments**

**Introduction**

**Chapter 1: LS Engines and Forced Induction**

LS Family Tree

Gen III Versus Gen IV

Supercharging Versus Turbocharging

Understanding Boost (Including PSI Versus Bar)

Drag Racing

LS Performance Potential

Cast Rotating Parts: Pushing the Factory Parts' Envelope

Compression Ratio and Recommended Boost Limits

Crankcase Ventilation

Importance of Tuning and Avoiding Detonation

Charge Cooling/Intercooling

Auxiliary Instruments

Forced-Induction Terms

Real-World Project: Larry Dye's 1,300-hp Gen V Camaro SS

**Chapter 2: Supercharger Types and Selection**

Positive-Displacement Superchargers

Centrifugal Superchargers

Kit and Cost Considerations

Positive-Displacement Versus Centrifugal Blowers

How Much "Blower" Do You Need?

Positive-Displacement Blowers: Calculating Boost and Increased Boost with a Pulley Change

Centrifugal Superchargers: Calculating Maximum Boost

Music to the Ears?

The Importance of a Charge Cooler

Surge Protection

Pulley Size and Performance

Belt Wrap and Belt Size

GM Factory-Supercharged LS9 and LSA Engines

### **Chapter 3: Turbocharger Types and Selection**

LS-Powered Production Vehicles

Turbocharger Component Terms 36 Operation Basics

Understanding Turbocharger Sizes

Selecting the Right-Size Turbocharger

Turbocharger Aspect Ratio

Pitfalls of Mixing Turbines and Compressors

Elements of a Turbo System

Boost Controller and Turbo Timer

Single- Versus Twin-Turbo Systems

Bolt-On Turbo Kits and Tuner Systems

### **Chapter 4: Kit Preinstallation**

Body and Chassis Component Removal

Engine Preparation

Fuel-Pressure Relief

Oil Pan/Oil System Modifications

“Pinning” the Crankshaft

Fuel Pump

Fuel Injectors

Spark Plugs

Real-World Project: Camshaft and Valve Springs Swap

### **Chapter 5: Supercharger Installation Projects**

Project 1: Roots/Screw-Type Supercharger Kit

Project 2: Centrifugal Supercharger Kit

### **Chapter 6: Turbocharger Installation Projects**

Real-World Project: Lingenfelter System  
Custom Turbo System Fabrication  
The STS Option  
Building a Race Car around a Turbo System

## **Chapter 7: Tuning for Supercharged and Turbocharged Engines**

Air + Fuel = Horsepower  
Mass Airflow Versus Speed Density  
Map Sensors  
GM Controllers  
Prepackaged Programming  
Aftermarket Flash Software  
Livernois Motorsports' X-Treme Cal Tuning System  
Stand-Alone Control Systems  
Chassis Dyno Tuning  
Wideband Tuning  
Throttle Body Considerations  
Electronic Throttle Concerns  
Methanol Injection  
E85 Conversion Basics

## **Chapter 8: Building an LS Engine for Boost: Cylinder Block and Rotating Assembly**

Cylinder Block  
Resleeving the Factory Aluminum Block  
Installing Piston Oil Squirters  
Rotating Assembly

## **Chapter 9: Building an LS Engine: Heads, Cam, and Induction**

Cylinder Heads  
Valves  
Valvetrain Components  
Cylinder Head Gaskets

Camshaft

Turbocharger Camshaft

Ignition and the Crank Trigger Conversion

Intake Manifold

Throttle Body

Fuel Injectors

## **Chapter 10: Engine Build Projects**

Supercharged Engine Build

Turbocharged Engine Build

## **Source Guide**
