

[Table Of Contents](#)

**Acknowledgments**

**What is a Workbench<sup>®</sup> Book?**

**Introduction**

**Chapter 1: Preparing to Rebuild the B and RB Big-Block Engines**

The Family Tree

OEM Blocks

B/RB Cylinder Heads

Crankshafts

Intake Manifolds

Exhaust Manifolds

Building a Street Engine

High-Performance Engine Rebuilding

Engine Build Philosophy

**Chapter 2: Tools and Cleaning Equipment**

Basic Hand Tools

Required Specialty Tools

Cleaning Equipment

**Chapter 3: Engine Removal and Disassembly**

Hood Removal

Tear Down

Cleaning Supplies

Original Status Documentation

Jackstands

Transmission Fluid

Air Conditioning

Radiator and Fan Shroud

Fuel Line, Belts and Electrical Wiring

Throttle and Shifter Linkage

Distributor

Organization During Disassembly

#### **Chapter 4: Inspection**

Check the Oil

Inspect the Cylinder Heads

Inspect the Crankshaft

Inspect the Cylinder Block

#### **Chapter 5: Parts Selection**

Rebuilding a Stock Engine

Rebuilding a Strong Street Engine

OEM Main Caps

Aftermarket Two-Bolt Main Caps

Four-Bolt Main Conversion

ARP Rod Bolts and Main Cap Bolts

Aftermarket Rods

Pistons

Cylinder Heads

Camshaft and Valvetrain

Rocker Arm Assembly

OEM Cast-Iron Intake Manifold

Mechanical Water Pumps

Thermostat

Headers

Fasteners

#### **Chapter 6: Machine Work and Short Block Build-Up**

Clean and Deburr the Heads

Select a Good Shop

Machine Shop Procedures

## **Chapter 7: Mocking Up Heads and Valvetrain**

Cylinder Heads

Valve Jobs

## **Chapter 8: Cleaning Your Machined Parts**

Work Area and Helpers

Basic Cleaning Supplies

Deep Cleaning

## **Chapter 9: Pre-assembly**

Engine Notebook

Tools

Supplies

Preparing to Rebuild Cylinder Block

Main Bearings and Caps Installation

Main Bearing Crush Measurement

Connecting Rods Installation

Prepare to Install Crankshaft

Piston Ring Installation

Camshaft Installation

Camshaft Degreeing

Rod Side Clearance

Rotating and Reciprocating Assemblies

## **Chapter 10: Final Assembly**

Tools and Equipment

Taking Notes

Assembly Lube or Motor Oil?

Painting the Inside of the Block

Camshaft Installation

Install Rear Main Seal

Install Cylinder Head Dowel

Install Crank and Main Bearings  
Pistons and Piston Rings  
Install Gear Set and Degree Cam  
Dampener Installation  
Oiling System  
Valvetrain Geometry  
Install Intake Manifold  
Final Installation and Adjustments

### **Chapter 11: Dyno Testing**

Setting Valve Lash  
Break-In  
Dyno Testing

### **Appendix: Torque Specifications for Fasteners**

Intake Manifold Torque Sequences  
Timing Chain and Gear Alignment  
Main Bearing Cap Torque Sequence  
Distributor Firing Order

### **Source Guide**
