

[Table Of Contents](#)

**Acknowledgments**

**Foreword by Steven Rupp**

**Introduction**

**Chapter 1:**

Choosing an LS Engine

Selection Process

GM LS Engine Architecture

Gen III Engines

Gen IV Engines

Gen IV Vortec Engines

Chevrolet Performance Engines

Other LS Engine Builders

Sourcing from a Junkyard or Salvage Yard

Sample Junkyard Pull and Buildup: A Turbo 5.3L

**Chapter 2:**

Engine and Subframe

Front Clip Sheet Metal

Stock Subframe

Engine Mounts

Oil Pans

Oil

**Chapter 3:**

Chassis and Suspension

Removing the Subframe

Front Suspension

Rear Suspension

Wheels

Tires

Installing Mini-Tubs

Brake Systems

**Chapter 4:**

Front-Drive Accessories

Camaro, Corvette, Truck and GM Kits

Balancers and Dampeners

Aftermarket Options  
Helpful Hints

### **Chapter 5:**

Fuel System  
Proper Planning  
Fuel Pump  
Filter  
Hose and Fittings  
Stock Fuel Tank Replacement  
Tank Replacement Sources  
AN Line Fabrication  
Gas Pedal

### **Chapter 6:**

Cooling System  
Radiator  
Radiator Hose Location  
Coolant Steam Line  
Heater Outlets  
Coolant Temperature Sensor  
Electric Fan  
PCV System

### **Chapter 7:**

Transmission  
T56 Install  
New-Style Transmissions  
Classic Transmissions  
Crossmembers  
Bellhousing

### **Chapter 8:**

Wiring  
Gauges  
Wiring Harness  
Adapting an LSX Wiring Harness  
ECM Calibration

### **Chapter 9:**

Exhaust and Induction  
Headers  
Oxygen Sensors  
Catalytic Converters  
Induction

### **Chapter 10:**

Initial Start-Up  
Systems Checks  
Leaks  
Nut and Bolt the Car  
Engine Break-In: First Firing and Test-Drive

### **Source Guide**
