Introduction

Chapter 1: Basic Brake Operation

Safety

Automotive Brake Systems

Electronics and Brake Systems

Chapter 2: Brake System Components

Understanding the Pieces

Beyond the Basics

Chapter 3: Disc Brake Systems

Operation

Inspection and Diagnosis

Service

Test Drive and Break-In

New Technology Precautions

Chapter 4: Drum Brake Systems

Operation

System Inspection

System Service

Parts Installation

Test Drive and Break-In

New Technology Precautions

Chapter 5: Parking Brake Systems

Operation

Inspection and Service

Drum-in-Hat Parking Brakes

Electrically Applied Parking Brakes

Chapter 6: Hydraulic Brake Systems

Operation

Master Cylinder

Hydraulic Valves

Antilock Brake System

Brake Lines

Brake Hoses

Banjo Fitting

Wheel Cylinders

Brake Calipers

Brake Fluid

Bleeding the System

Chapter 7: Brake Assist Systems

Vacuum

Hydroboost

Electronic

Chapter 8: Brake System Troubleshooting

Brake Noise

Popping Sound When Braking

Brake Grinding

Brake Pull

Nosedive

Brake Lockup

Hard Pedal

Soft, Spongy, Sinking, or Low Pedal

Pulsating Pedal and Steering Wheel Shimmy

Brake Fade

Brake Drag, Smell, or Smoke

Low Fluid in the Master Cylinder

Rapid Pad Wear

Dirty Fluid

Chapter 9: ABS, ADAS, and Related Systems

ABS Operation

ABS Sensors and Testing

ABS-Related Systems

Other Brake-Related Technologies

ADAS Systems

The Importance of Communication

Communication Increasing

Final Thoughts

Chapter 10: Disc and Drum Complete Brake Job

Front Disc Brake Replacement

Preparing the Vehicle

Front Disc Brake Disassembly and Inspection

Preparation for Reassembly

Front Disc Brake Reassembly

Brake Bleeding and Leak Testing

Hoisting the Vehicle and Rear Wheel Brake Shoe Replacement

Rear Brake Disassembly

Rear Brake Cleaning and Reassembly
