

[Table Of Contents](#)

**Chapter 1: Introduction**

**Chapter 2: Stroker Theory**

Efficiency Factor

The Torque Curve

Comparisons

The Siren Song of RPM

**Chapter 3: Cylinder Blocks**

Early Blocks

1986 and Later Blocks

Bow Tie Blocks

Dart Blocks

World Products

The Cost of Power

**Chapter 4: Crankshafts**

Crank Basics

Cast Cranks

Forged Cranks

Stroke

Torsional Dampers

Conclusion

**Chapter 5: Connecting Rods**

Stock Rods

Materia

Stroker Rods

Fasteners

I-Beam, H-Beam

## **Chapter 6: Pistons and Rings**

Materials and Processes

Dished or Domed?

Compression Height

Weight

Rings

## **Chapter 7: Camshafts**

Flat and Roller

Eccentric Info

Intake Centerline

Lobe Separation Angle

## **Chapter 8: Valvetrains**

Lifters

Pushrods and Guideplates

Retainers

Valvesprings

Rocker Arms

Miscellaneous Components

## **Chapter 9: Cylinder Heads**

Iron vs. Aluminum

Angle of Attack

Ports o' Call

Evaluating Flow

Iron Heads

Aluminum Heads

Conclusion

## **Chapter 10: Exhaust Systems**

Exhaust Opening

Primary Pipe Diameter

Primary Pipe Length

Collector Effects

Header Variables

H and X-Pipes

Making Everything Fit

## **Chapter 11: Induction Systems**

Induction Theory

Port Length

Port Size

Dual-Plane Intakes

Single-Plane Intakes

Carburetors

EFI

## **Chapter 12: Lubrication System**

Oil Pumps

Oil Pans

Synthetics

Oil Coolers

Conclusion

## **Chapter 13: Building and Blueprinting**

Measuring Tools

Assembly Tools

## **Chapter 14: Power Packages**
