

Please READ and FOLLOW all instructions carefully.

Step 1- Track Placement

Determine location to mount TRACK, making sure that when bike is mounted in carrier, the handlebars, levers or bar-ends do not hit the back of the truck. If mounting in the bed of a pick up, TRACK can be mounted to either the front wall of the bed or the floor of the bed. The TRACK is typically mounted with the TRACKS sticker in an upright, readable position (note above illustration).

Parts List

- 3-Flat Socket Head Cap Screw 1/4-20x1"
- 3-Flat Washer 1/4"
- 3-Nylock Nut 1/4-20"

Step 2- Mounting Track

Once you have determined where to mount carrier, mark location of center hole in track. Using a 1/4" drill bit, drill out center hole. To secure carrier insert flat head screw through TRACK and then drilled out hole. If mounting to the front wall of the bed, it may be necessary to tape washer & locking nut to the box end of a wrench, due to not having enough room to access the threads of the screw. Once you have secured washer & locking nut, align track parallel to the bed and drill remaining 2 mounting holes and secure with remaining hardware.

Additional Notes

- Please pay attention to the orientation of the TRAPS to the TRACK before mounting carrier.
- If your vehicle has a bed liner, you need to drill thru the liner and may need to purchase longer bolts from your local hardware store.
- When carrying multiple bikes, we recommend securing all back tires together to form a triangle to help prohibit undesirable movement of bikes
- When using carrier in a truck that doesn't have a tail gate, make sure to secure either carrier or bikes to the vehicle.
- It's the end users responsibility to ensure that use of this product meets all local and state laws.

Caution

Carrier's attachment is critical and beyond the control of the manufacturer. Graber Products has no control over the mounting of the TRAPS and as such can not assume responsibility for any damages to your vehicle. The following instructions are meant to be guidelines for attachment. It is the end users responsibility to insure a secure installation. Manufacturer and seller expressly disclaim any and all liability for personal injury, property damage or loss, whether direct, indirect, or incidental, resulting from the incorrect attachment, improper use, inadequate maintenance, or neglect of this carrier.
