Performance

- Enhance the ordinary with precisionccc
- accessories Unique designs for optimal performance

At Sector Seven we stand behind the quality of our products. Everything we make is precision engineered from billet aluminum and hand assembled in our Idaho manufacturing facility. We use our products, we believe in our quality, and we stand behind everything we make.

We are committed to developing UTV accessories like our UTV lights and UTV mirrors of unparalleled quality. Our Spectrum light mirror combination has a distinctive design and is precision engineered with superior photometric technology. This is how we stay a cut above the competition!

Proven Quality:

.Best LED Off-Road Lights

We offer UTV lights of superior quality that output 8,000 raw lumens of light; brighter than any competitor on the market. We use the highest quality materials and cutting edge technology to deliver a UTV light mirror that is unmatched.

.Rugged Housings

Housing plays a vital role in ensuring that UTV side mirrors and LED lights can withstand any off-road conditions. Sector Seven offers light and side mirrors that are made from 6061 billet aluminum for durability and performance. Our LED off-road light mirrors provide adjustable breakaway action, while the ball joint adjustable mirror enables adjustment without chance of vibration.
