MATRIX GAUGES - The Matrix gauge set is intended to operate on Mercury SmartCraft engines (max 4 engines/2 stations) utilizing the SmartCraft® protocol. The gauges operate on 12 volt systems and support single, dual, triple or quad engine applications. In a Matrix gauge set, the 3" tachometer is the master and connects directly to the SmartCraft data bus. All other gauges are slaves and connect to the tachometer RS-485 private bus (immune to electrical noise, more robust and reliable). The tachometer reads SmartCraft engine parameters and forwards them on the private bus for the slave gauges.

FEATURES:

- Smart Tachometer CANbus driven
- All 2" gauges receive data from tachometers
- LCD on Tachometer and Speedo displays all available data and alarms
- IP67 waterproof/ submersible housings (with Connector fitted)
- Dry Nitrogen filled to minimize fogging
- LED dimmable, automotive style backlighting (red)
- CANbus connectivity

CODE T

Diesel Alternator Tachometers ..... alternator

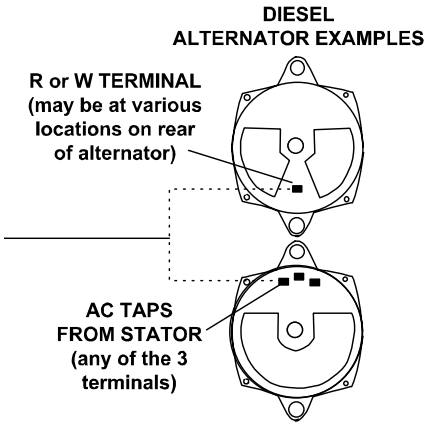

NOTE: Alternator must have an AC tap, usually marked “AC”, “R” or “W”. If such a tap is not present, a local alternator repair shop can usually add one.

You will need to know the number of magnetic poles in your alternator.

Consult the alternator maker or local alternator repair shop if you do not know this.

Also, you will have to calculate the pulley ratio from crankshaft to alternator.

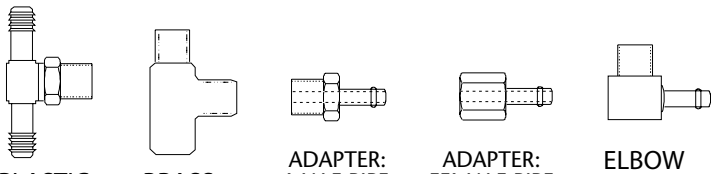

Tachometers are factory calibrated for several combinations of poles and pulley ratios, but in almost all cases you will need a Portable Master Shop Tachometer for initial calibration.

Anti-rotation collar. Use when installing non-illuminated RotoSwitches in very thin dash panels. This adapter prevents the switch from "slipping" if excessive force is used to actuate the switch.

ILLUMINATION MODULES

Add flexibility and function to any installation of RotoSwitch® rotary switches. By using a variety of colored lenses, the status of each switch – "Off", "On-1", "On-2" – can instantly be determined.

HOSE SYSTEMS

INSTALLATION, INSPECTION & MAINTENANCE

Don't Neglect This Critically Important System On Your Boat

Shields Marine manufactures a wide variety of hoses for applications onboard pleasure craft. Serving as conduits for fluids, air or exhaust, each Shields hose is designed for a specific application and meets strict standards set by the USCG, ABYC and other regulatory agencies. Hoses also serve as vibration absorbers, isolating components such as exhaust manifolds from the hull of the vessel.

Installers should be mindful of using the right hose for the job. Correct hose and coupling methods should be carried out as outlined by EPA, ABYC, USCG, SAE and the NMMA. Any questions regarding application, replacement or installation should be referred to the Shields technical service department at 217-324-9400.

Inspection

Hose applications aboard any vessel are likely to be mission-critical. Therefore, failure to inspect and replace worn or aged hose can result in the loss of property or possibly, the loss of life. All mission-critical hose – fuel, wet exhaust, bilge pump, bilge vent and hoses connected below the water line – should be inspected prior to each use of the vessel. All fittings and clamps should be secure and properly attached. All hoses and connections should be inspected annually by a qualified marine mechanic.

Maintenance and Replacement

If inspection reveals hose damage, those hoses should be replaced consistent with industry standards. Replace hose that exhibits any of the following signs:

- Cuts, gouges, cracks
- Exposed fabric or wire reinforcement
- Soft spots or bulges
- Loose covers or kinks
- Stiffness or inflexibility

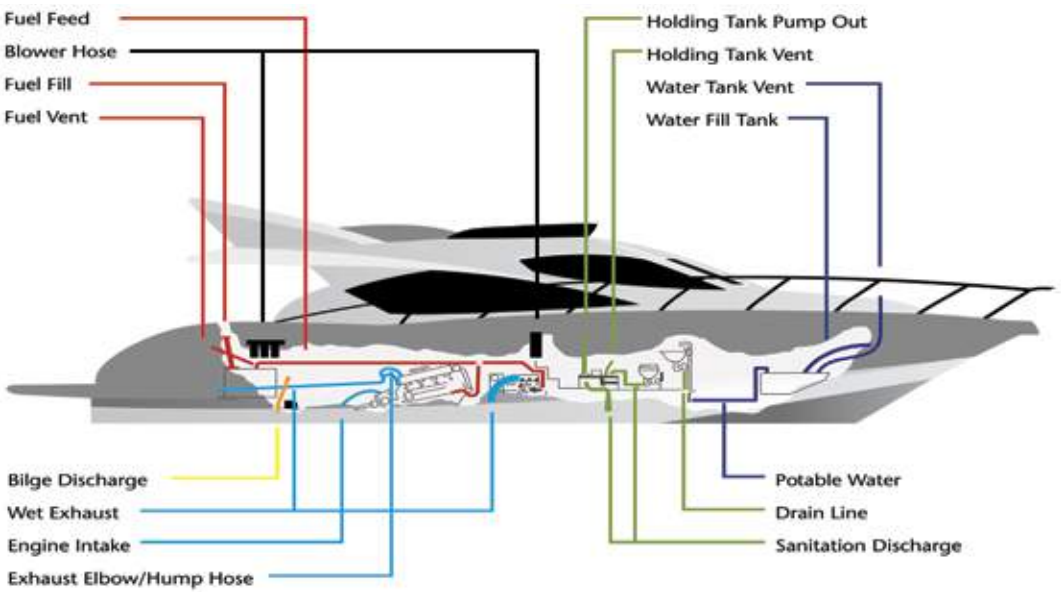

Installation

Hoses shall be secured by corrosion resistant clamps equal to or greater that 300 grade stainless steel. Clamps shall not depend solely on spring tension. Clamps should not be over-tightened, as this may damage the hose or fitting. Fittings must be the proper size for the hose. Forcing a hose over an oversized fitting or clamping down the hose on an undersized fitting may damage the hose and cause failure.

FEATURES

Ethanol blended fuel absorbs more water and loosens more particulants than regular fuels. Proper filtration is required for every horsepower engine. Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow at 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

FUEL WATER SEPARATORS

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard, sterndrive and outboard fuel injection systems.

ALL SIERRA FUEL PUMPS INCLUDE MOUNTING GASKET

Many fuel pumps are often used on similar engines. In order to identify the correct fuel pump for your application, it is necessary to determine the position of the inlet, outlet and separator fitting (where applicable) in relation to the rocker arm. The angle between the rocker arm and the fuel inlet is expressed in terms of clock position. Place pump with rocker arm in the 12 o'clock position. The rocker arm must be held behind the fuel pump body. (The bottom of the fuel pump body must face you.) Observe the relationship of the fuel inlet to the rocker arm. This position is the clock position of the pump. Examples of this in the outline drawing below show that if the fuel inlet is at position "A", it is considered a 6 o'clock pump, if at position "B". a 3 o'clock pump, and at position "C" an 8 o'clock pump.

FUEL WATER SEPARATORS

Sierra offers a complete line of 10 and 21 micron fuel water separating filters including drainable bowl filters to protect your carbureted and fuel injected engine.

Refer to pages 136-140 for a complete listing of OEM and universal applications.

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

FUEL WATER SEPARATORS

Sierra offers a complete line of 10 and 21 micron fuel water separating filters including drainable bowl filters to protect your carbureted and fuel injected engine.

Refer to pages 136-140 for a complete listing of OEM and universal applications.

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

FUEL WATER SEPARATORS

Sierra offers a complete line of 10 and 21 micron fuel water separating filters including drainable bowl filters to protect your carbureted and fuel injected engine.

Refer to pages 136-140 for a complete listing of OEM and universal applications.

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as smAll as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

FUEL WATER SEPARATORS

Sierra offers a complete line of 10 and 21 micron fuel water separating filters including drainable bowl filters to protect your carbureted and fuel injected engine.

Refer to pages 136-140 for a complete listing of OEM and universal applications.

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

Model Description	Horse-power	Trim & Tilt/Starting Method	Shaft Length	Control Method	Model Year	Special Model Variation Code (Used on 25HP engines)
B = Inshore series C = C series model CV = C series D = Twin rotating propellers DX = Twin rotating propellers OX66 EFI E = Enduro series model F = Four stroke engine model LF = Left hand four stroke L = Left hand engine model LX = Left hand OX66 EFI LZ = Left hand HPDI P = Pro series model PX = Pro series OX66 EFI S = Saltwater series model SX = Saltwater series OX66 EFI T = Four stroke engine with high thrust V = V max series model VX = V max OX66 EFI VZ = V max HPDI Z = HPDI series	Example: 6 9.9 200 250	T = Power tilt or trim/tilt (1984-1990) P = Power tilt with electric start E = Electric start (1984-1990) M = Manual tilt with manual start	S = 15" L = 20" X = 25" U = 30"	R = Remote control H = Tiller handle J = Jet drive unit	N = 1984 K = 1985 J = 1986 H = 1987 G = 1988 F = 1989 D = 1990 P = 1991 Q = 1992 R = 1993 S = 1994 T = 1995 U = 1996 V = 1997 W = 1998 X = 1999 Y = 2000 Z = 2001 A = 2002 B = 2003 C = 2004 D = 2005	2 = 3 Cyl. 1997 3 = 3 Cyl.

Starting in April 2005 (2006 Model Year and newer) Yamaha no longer designated model years at the end of the model number identification. Beginning at this time any subsequent "new model" will have a letter designation between the Horsepower and the Control / Tilt Method.
Example:
VZ300TLRD = 2005 VZ300TLR = New model after April 2005. VZ300BTLR = Newest Model and direct replacement for previous models.

EXAMPLE: SX150TLRY - Saltwater EFI, 150 HP, Trim & Tilt w/electric start, 20", Remote control, 2000 model

Ignitor II ELECTRONIC IGNITION

FEATURES

- Senses current levels in the coil and adjusts the dwell to maintain peak energy throughout the entire RPM range.
- Develops, on average, 4 times more available energy between 3000 and 5000 RPM's and twice as much plug voltage as point-type systems.
- Ignition energy is sustained and coil life is increased when peak current level is reached just prior to spark.
- More stable timing.
- Use with 18-5472 "Flame Thrower II" Coil for optimum performance

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

Ignitor® II ELECTRONIC IGNITION

FEATURES

- ***Senses current levels in the coil and adjusts the dwell to maintain peak energy throughout the entire RPM range.***
- ***Develops, on average, 4 times more available energy between 3000 and 5000 RPM's and twice as much plug voltage as point-type systems.***
- ***Ignition energy is sustained and coil life is increased when peak current level is reached just prior to spark.***
- ***More stable timing.***
- ***Use with 18-5472 "Flame Thrower II" Coil for optimum performance***

FUEL WATER SEPARATORS

Sierra offers a complete line of 10 and 21 micron fuel water separating filters including drainable bowl filters to protect your carbureted and fuel injected engine.

Refer to pages 136-140 for a complete listing of OEM and universal applications.

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

Ignitor II ELECTRONIC IGNITION

FEATURES

- Senses current levels in the coil and adjusts the dwell to maintain peak energy throughout the entire RPM range.
- Develops, on average, 4 times more available energy between 3000 and 5000 RPM's and twice as much plug voltage as point-type systems.
- Ignition energy is sustained and coil life is increased when peak current level is reached just prior to spark.
- More stable timing.
- Use with 18-5472 "Flame Thrower II" Coil for optimum performance

FUEL WATER SEPARATORS

Sierra offers a complete line of 10 and 21 micron fuel water separating filters including drainable bowl filters to protect your carbureted and fuel injected engine.

Refer to pages 136-140 for a complete listing of OEM and universal applications.

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

FUEL WATER SEPARATORS

Sierra offers a complete line of 10 and 21 micron fuel water separating filters including drainable bowl filters to protect your carbureted and fuel injected engine.

Refer to pages 136-140 for a complete listing of OEM and universal applications.

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

Ignitor II ELECTRONIC IGNITION

FEATURES

- Senses current levels in the coil and adjusts the dwell to maintain peak energy throughout the entire RPM range.
- Develops, on average, 4 times more available energy between 3000 and 5000 RPM's and twice as much plug voltage as point-type systems.
- Ignition energy is sustained and coil life is increased when peak current level is reached just prior to spark.
- More stable timing.
- Use with 18-5472 "Flame Thrower II" Coil for optimum performance

FUEL WATER SEPARATORS

Sierra offers a complete line of 10 and 21 micron fuel water separating filters including drainable bowl filters to protect your carbureted and fuel injected engine.

Refer to pages 136-140 for a complete listing of OEM and universal applications.

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

FUEL WATER SEPARATORS

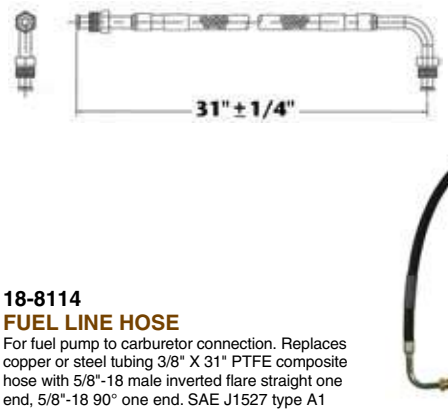

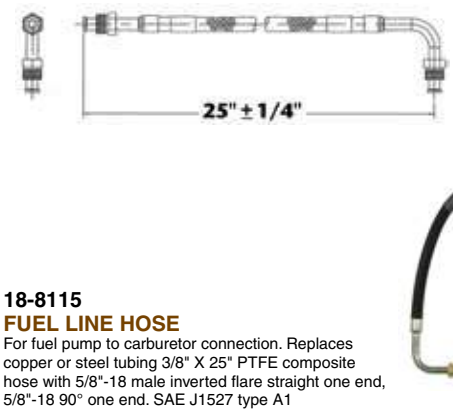

Sierra offers a complete line of 10 and 21 micron fuel water separating filters including drainable bowl filters to protect your carbureted and fuel injected engine.

Refer to pages 136-140 for a complete listing of OEM and universal applications.

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

OIL FILTERS

Sierra oil filters are engineered with premium grade materials that will not only withstand but excel in the extreme environment of the Marine world. Sierra ensures the excellent performance of their filters by:

- Epoxy coating all canisters for corrosion resistance.
- Using a heavy-wall steel canister for further corrosion protection.
- Using high-efficiency filter media that meets or exceeds the OE's filtration.
- Backed by Sierra's industry leading warranty.

Ignitor II ELECTRONIC IGNITION

FEATURES

- Senses current levels in the coil and adjusts the dwell to maintain peak energy throughout the entire RPM range.
- Develops, on average, 4 times more available energy between 3000 and 5000 RPM's and twice as much plug voltage as point-type systems.
- Ignition energy is sustained and coil life is increased when peak current level is reached just prior to spark.
- More stable timing.
- Use with 18-5472 "Flame Thrower II" Coil for optimum performance

FUEL WATER SEPARATORS

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

V-BELTS

1. High strength synthetic cords resist shockload failure. Their low stretch properties assure uniform performance over the life of the belt.
2. The compression section is a special rubber compound that assures smooth and even transfer of load forces to the cords.
3. Cogs are molded to precise engineering tolerances to improve flexibility and maintain cord support. Cog geometry provides a large area for air circulation to keep the belt cool and prevent damaging heat build up in the cushion section.
4. Rubber edges maintain positive, no-slip contact with pulley grooves for reliable energy transfer.

U-Joint Coupling End Yoke (39385A1) used on older in-line models

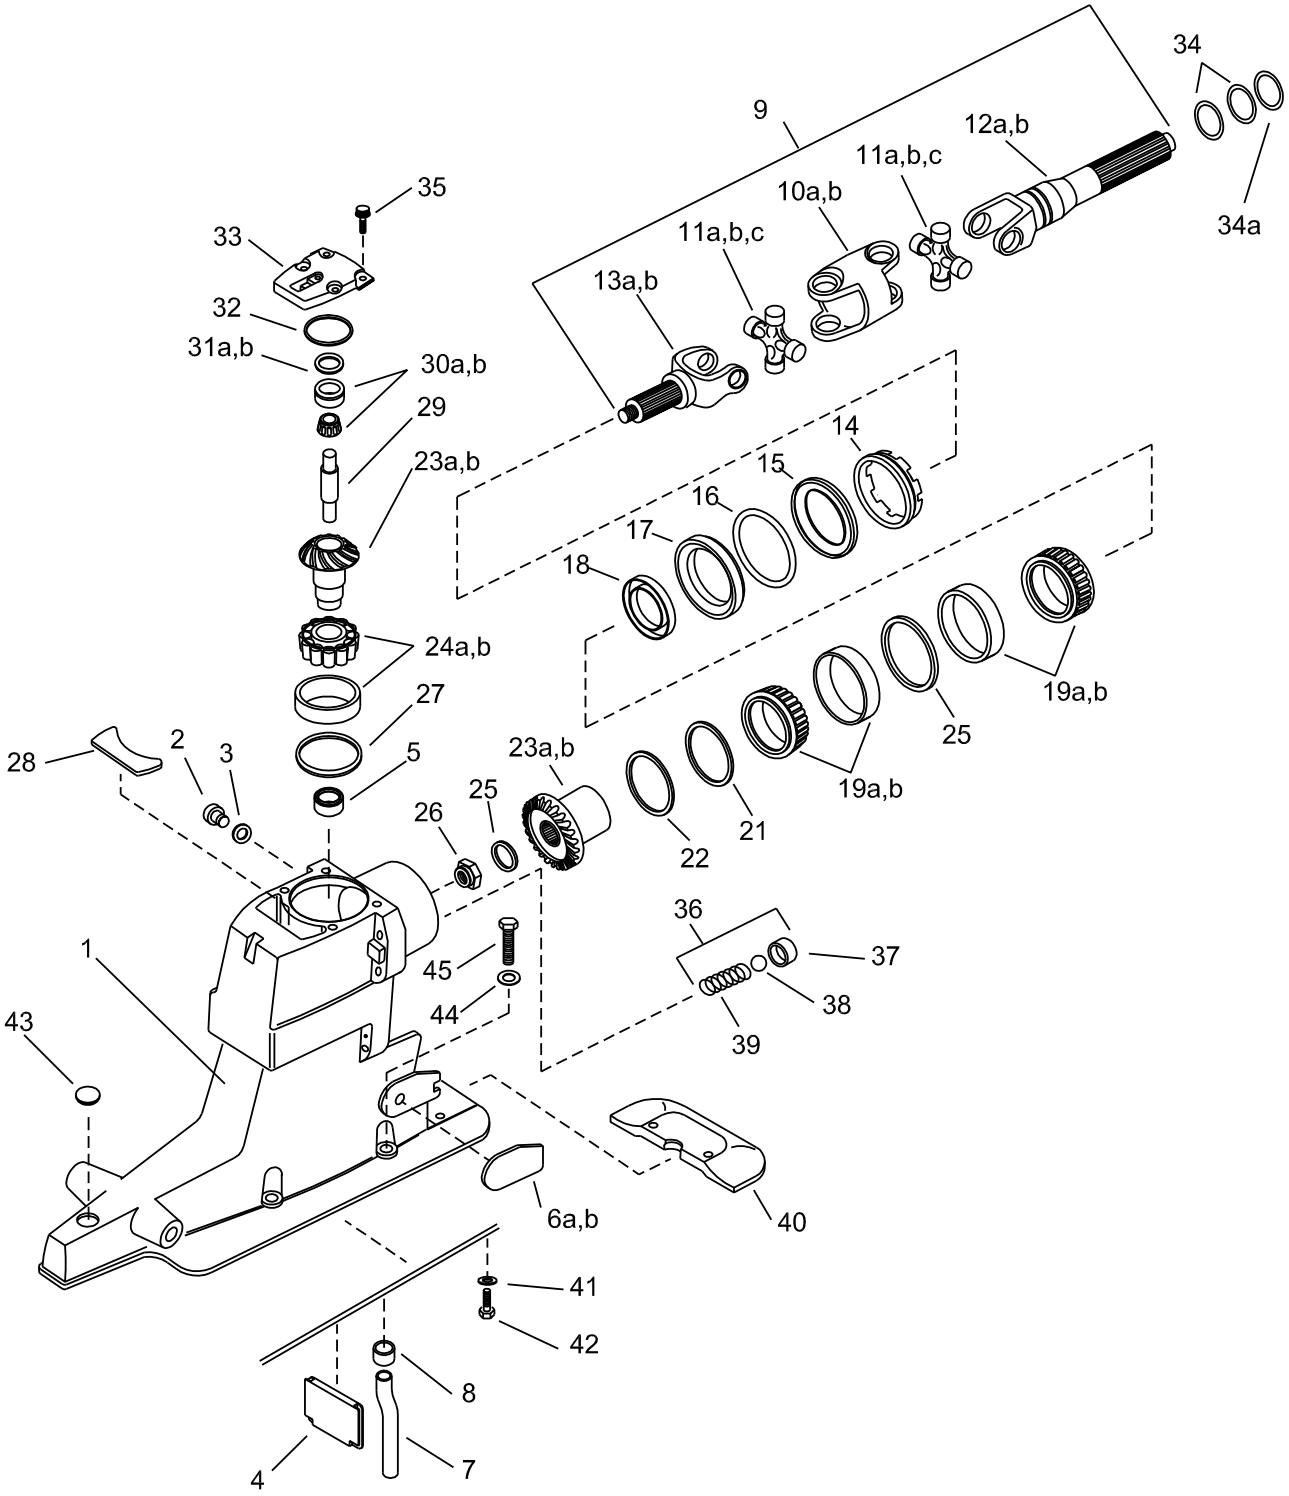

Use of Older Model Stern Drive Units On Mercruiser IR-IMR Models

Mercury Marine does not recommend the use of older model stern drive units on IR-IMR models, as these units will not mate up satisfactorily with the transom assembly. In addition, the older model in-line stern drive units are equipped with U-Joint coupling end yoke (39385A1). This yoke is shorter than yoke (59830A1) used on the IR-IMR stern drive units, and therefore, will not fully engage the engine coupler splines. **Use of an older In-Line model stern drive unit on a IR-IMR model will result in a spline failure to coupling and/or yoke.**

FIG. #1

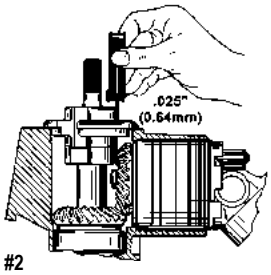

FIG. #2

FIGURES #1 - #2
Provides two separate views of the upper gear housing driven gear being properly shimmed using the Sierra installation tools.

FIGURES #3 - #4
Provides the same views of the drive gear being shimmed in the same application.

NOTE:
This installation **cannot** be performed correctly without the Sierra 18-9856 shim tool. Improper installation **will** result in gear failure. The .025 referenced in **FIG #2** & **FIG #4** is achieved when .026 will not fit the clearance but .025 will.

A service manual should always be consulted for step-by-step instructions.

V-BELTS

1. High strength synthetic cords resist shockload failure. Their low stretch properties assure uniform performance over the life of the belt.
2. The compression section is a special rubber compound that assures smooth and even transfer of load forces to the cords.
3. Cogs are molded to precise engineering tolerances to improve flexibility and maintain cord support. Cog geometry provides a large area for air circulation to keep the belt cool and prevent damaging heat build up in the cushion section.
4. Rubber edges maintain positive, no-slip contact with pulley grooves for reliable energy transfer.

V-BELTS

1. High strength synthetic cords resist shockload failure. Their low stretch properties assure uniform performance over the life of the belt.
2. The compression section is a special rubber compound that assures smooth and even transfer of load forces to the cords.
3. Cogs are molded to precise engineering tolerances to improve flexibility and maintain cord support. Cog geometry provides a large area for air circulation to keep the belt cool and prevent damaging heat build up in the cushion section.
4. Rubber edges maintain positive, no-slip contact with pulley grooves for reliable energy transfer.

FUEL WATER SEPARATORS

Sierra offers a complete line of 10 and 21 micron fuel water separating filters including drainable bowl filters to protect your carbureted and fuel injected engine.

Refer to pages 136-140 for a complete listing of OEM and universal applications.

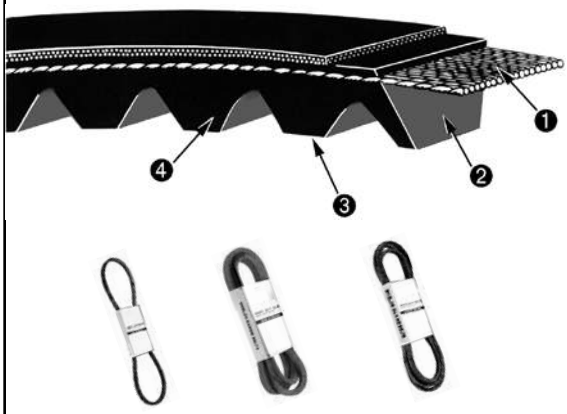

Sierra fuel water separators remove over 99.8% of emulsified water from your gasoline. Sierra's 10 micron filters are over 90% efficient at removing particles as small as 10 micron. All filters flow @ 90 GPH to feed even the hungriest motor. Sierra 10 micron filters are recommended to prevent damage to sensitive inboard and outboard fuel injection systems.

V-BELTS

1. High strength synthetic cords resist shockload failure. Their low stretch properties assure uniform performance over the life of the belt.
2. The compression section is a special rubber compound that assures smooth and even transfer of load forces to the cords.
3. Cogs are molded to precise engineering tolerances to improve flexibility and maintain cord support. Cog geometry provides a large area for air circulation to keep the belt cool and prevent damaging heat build up in the cushion section.
4. Rubber edges maintain positive, no-slip contact with pulley grooves for reliable energy transfer.

Sierra Customer Satisfaction Warranty (Professional Installer)

Limited Warranty (to include Sierra, Shields and Instrumentation Product Groups):
SIERRA INTERNATIONAL INC. ("SIERRA") warrants its products to be free of defects in workmanship and materials for the useful life of the product (the "Warranty"). If a SIERRA product fails to comply with the Warranty, SIERRA will repair or replace the defective product free of charge. The Warranty is subject to the additional terms, conditions and limitations set forth below.

Warranty Claims for Professionally Installed Products:
For any SIERRA product that was originally installed on a vessel by a dealer or other professional installer that fails to comply with the Warranty, in addition to repairing or replacing the product free of charge, SIERRA will also reimburse the customer for reasonable labor charges incurred to replace the product, and reasonable towing and other similar incidental expenses incurred as a result of the failure of the product to comply with the Warranty. Labor will be calculated based on the installer's posted shop rate that is competitive with their local market rates. The original work order along with the original invoice and a copy of the new re-work order must be provided to SIERRA to file a claim for reimbursement of labor expenses. Towing charges will also be paid based on reasonable and customary rates in the local trading area. A copy of the original invoice for the towing service must be provided to SIERRA to file a claim for reimbursement of towing expenses.

ALL PROFESSIONAL INSTALLER WARRANTY CLAIMS MUST BE SUBMITTED IN ACCORDANCE WITH THE FOLLOWING PROCEDURE:

A free user account is required. Dealers may also continue to use the options below.

WITHOUT LABOR CLAIM - The dealer may return any allegedly defective SIERRA product to the distributor from whom it was purchased for analysis. The product shall be tagged with the SIERRA part number, date of purchase and the alleged cause of failure. The distributor will then forward the product to SIERRA with a request for credit. If SIERRA determines that the part failed to comply with the Warranty and otherwise qualifies for Warranty coverage under the terms hereof, SIERRA will issue credit for the product to the distributor. The distributor will reimburse the dealer. SIERRA will not issue credit for any products that are not returned to SIERRA. Products not manufactured or distributed by SIERRA will be held for disposition for 30 days.

WITH LABOR CLAIM – All warranty claims for which reimbursement of labor and/or towing expenses is sought are subject to prior authorization.
In order to process all claims quickly and efficiently, the following must be shipped directly to SIERRA via a traceable and insurable method (i.e. UPS, Federal Express, Registered U.S. Mail, etc.):

1. The allegedly defective product and any related damaged parts.
2. A written estimate detailing the following information:
   a. A complete list, including part numbers, of all products required for the warranty repair.
   b. The shop labor rate and a breakdown of the time required for the repair.
   c. The year, model and serial number of the warranted engine or drive.
   d. The name and address of the distributor the products were purchased from.
   e. The name, address and phone number of the end consumer.
3. The original work order or receipt detailing the initial installation of the allegedly defective product.
4. Any receipts detailing additional expenses.

Failure to provide required documentation and information may void all or part of the Warranty coverage.

Proof of delivery will be required on all lost shipments.
NOTE: Concerning labor claims on older products that cannot be rectified due to the unavailability of OEM replacement parts; SIERRA reserves the right to extend only the market value of the OEM product.
Limitations:
THE EXPRESS WARRANTY SET FORTH ABOVE IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. SIERRA does not warrant against, and the Warranty shall be void with respect to, damages or defects arising out of any of the following:

- improper or abnormal use or handling of SIERRA's products;
- installation or use of a SIERRA product in a manner that is inconsistent with SIERRA's application information, guidelines, instructions and/or specifications;
- defects in products or components not manufactured by SIERRA;
- non-SIERRA made products or components;
- SIERRA products transferred from a vessel on which they were originally installed;
- SIERRA products transferred from the engine on which they were originally installed;
- failure to maintain SIERRA products in accordance with SIERRA's application information, guidelines, instructions and/or specifications;
- ordinary wear and tear resulting from the operation and/or use of the SIERRA product.

This warranty also does not apply to products which have been altered or upon which repairs have been affected or attempted by persons other than pursuant to written authorization by SIERRA.

THIS STATEMENT OF LIMITED WARRANY IS NOT A STATEMENT OF THE USEFUL LIFE OF ANY SIERRA PRODUCT. WHEN SIERRA WARRANTS ITS PRODUCTS FOR THE USEFUL LIFE OF THE PRODUCT, THIS DOES NOT GUARANTEE THAT THE PRODUCT WILL LAST FOREVER OR FOR THE LIFE OF THE VESSEL. THE LENGTH OF THE USEFUL LIFE OF SIERRA'S PRODUCTS WILL VARY DEPENDING ON THE TYPE OF PRODUCT, AS SPECIFIED IN SIERRA'S APPLICATION INFORMATION, GUIDELINES, INSTRUCTIONS AND SPECIFICATIONS FOR EACH PARTICULAR PRODUCT. PLEASE REFER TO THE INFORMATION PROVIDED WITH YOUR SIERRA PRODUCT IN ORDER TO DETERMINE THE USEFUL LIFE OF THAT PRODUCT.

The sole and exclusive obligation of SIERRA shall be to repair or replace the defective products in the manner set forth above. SIERRA shall not have any other obligation with respect to the products or any part thereof, whether based on contract, tort, strict liability or otherwise. Under no circumstances, whether based on this Warranty or otherwise, shall SIERRA be liable for any special, punitive or consequential damages.
