

SIMPSON PERFORMANCE PRODUCTS IS PROUD TO DEDICATE OUR 2017 CATALOG TO TONY STEWART.

In his NASCAR career Tony won three Sprint Cup Championships. He also won an IndyCar championship, and is the only driver in racing history to be crowned champion in both those series. Tony is retiring from Sprint Cup racing as a driver, but as an owner of Stewart-Haas Racing, we're sure we'll see him at NASCAR tracks for years to come. We're honored to have been Tony's safety equipment supplier for his entire NASCAR career. And we thank him for being a shining, winning example that safer is faster.

Simpson is all about helping drivers be safer.

Our high tech helmets are lightweight yet remarkably strong, tested rigorously to easily surpass the most stringent standards. Our innovative head and neck restraints fit perfectly with all harness configurations. Our <u>racing suits</u>, <u>gloves and shoes provide unmatched comfort and performance</u>. Our robust harnesses keep drivers secured and upright in the seat with spine in line.

But Simpson equipment goes beyond protecting drivers' bodies. It also unleashes their confidence. When drivers know they're in the Simpson safety cell, it frees them to be more fearless on the track. It allows them to push themselves and their cars closer to the edge. Because the edge is where victory lives.

......

Simpson is all about helping drivers be safer. Because safer is faster.

SIMPSON. SAFER IS FASTER.

SNELL 2015 RACING HELMETS

Snell SA rating is the most widely accepted standard for racing helmet safety in the world. The Snell standard is updated once every five years, generally improving helmet protection each time. Effective October 1, 2015, helmet manufacturers began selling Snell 2015 rated helmets, meeting Snell's latest and most stringent safety standards. The helmets are clearly marked with the Snell 2015 safety label. SA .

AN OVERVIEW OF THE IMPROVEMENTS TO THE SA2015 STANDARD VERSUS THE SA2010 STANDARD IS EXPLAINED HERE.

SA2015 helmets are equipped with FIA 8858-2010 compliant M6 terminal mounts for head restraints. Head restraints such as the widely used HANS and Hybrid styles have been credited as being the number one lifesaving advance in personal racing safety equipment of the last 20 years.

SA2015 includes provisions for Low Velocity impact testing. For the racer, this test ensures performance in low velocity crashes.

A single helmet is tested in five separate sites on a flat anvil on or above the helmet's test line. No impact may exceed 200G and the average of the five peaks must not exceed 180G.

SA2015 includes Low Lateral impacts at the intersection of the head form reference and transverse planes. This is the key area around the ear and temple.

The peak G criteria for helmets tested on head forms of less than 60 cm circumference (ISO A-J) has been raised to 300 G and the velocity of the first impact has been increased to 8.5 m/sec. Second impact velocities have been reduced.

The peak G criterion for the ISO M head form remains at 264 G but the first impact velocity has been increased to 8.0 m/sec. The second impact velocity has been reduced.

SA2015 certification will require two more helmet samples than SA2010 demanded. One of these is for the FHR testing and the other for the additional impact tests.

Generally racers wear what is required by their sanctioning bodies. Each sanctioning body establishes which standards it will accept and how old the rating can be. Be sure to keep up with your sanctioning body and local track requirements.

CERTIFICATIONS

FIA : The Fédération Internationale de l'Automobile (FIA), Headquartered in Paris, France is a non-profit organization that brings together 227 national motoring and sporting organizations from 132 countries on five continents. FIA Formula One World Championship, FIA World Rally Championship and FIA World Touring Car Championship are among the sanctioning bodies who abide by FIA standards.

SFI: The SFI Foundation, Inc. (SFI) is a non-profit organization established to issue and administrate safety standards for specialty and performance of automotive and racing equipment. SFI oversees testing and standards for racing suits, restraints and many other high performance safety products in the United States. NASCAR, SCCA, IRL and NHRA are among the sanctioning bodies who abide by SFI standards.

ÍNFI I

SNELL : Snell Memorial Foundation is known for its ongoing work in setting, maintaining and continually upgrading helmet standards in Motorsports in the world. NASCAR, NHRA, SCCA and IRL are among the sanctioning bodies who abide by Snell helmet standards.

DOT: United States Department of Transportation - meets US DOT requirements for motorcycle helmets.

MERSURING FOR A HELMET

A correctly fitted helmet should feel like an even amount of pressure is being exerted around your head and cheeks But, helmets break in, so it should fit as tight as you can comfortably wear it. Once fastened, you should NOT be able to pull it off your head in any direction. Attention first-time helmet buyers: If your helmet is loose at all, and doesn't fit well, it CANNOT deliver the best protection. A helmet's strict safety standards can be compromised after only one impact collision. If the integrity is in question, send it back to us for proper inspection.

MEASURE DIRECTLY ABOVE THE BROW LINE FOR THE BEST HELMET FIT. I SIMPSON RECOMMENDS INSPECTION OF YOUR HELMET AFTER ANY IMPACT COLLISION.

RADIO COMMUNICATION

Simpson is proud to offer Rugged Radio's exclusive communication technology for Racing Radio Driver and Crew Communication systems. Order your favorite Simpson helmet complete with factory installed communications equipment. Save time, save on shipping charges. Helmet kit pricing as shown includes installation. Simpson helmets are fully certified to be Snell and/or FIA compliant when equipped with Rugged Radios helmet kit installations. PCI Radios also available for off road applications.

KIT INCLUDES FLEX BOOM, HELMET SPEAKERS AND 3.5 MM EAR BUD JACK

This complete off road flex boom helmet kit features Rugged Radios' new Dura-Link Sealed Connector. Clear Hear speakers and dynamic noise canceling mic for best audio performance, and 3.5mm input port for music cable or ear buds. Helmet speakers are easy to install with peal and stick hook and loop fastener back. The Dura-Link Seal is a new molded design now featured on all Rugged helmet kits to seal the connection between the intercom cable and helmet kit plug. This new design is perfect for offroad race teams. The Dura-Link Seal protects the connection contacts from water, mud and dirt which can affect audio performance. The Dura-Link Seal works with current Rugged off-road intercom cables; and is now featured on all Rugged Offroad helmet kits.

SAFER IS FASTER

ШНЯТ УОЦ ПЕЕД ТО КПОШ

WHY DO I NEED A FRONTAL HEAD RESTRAINT SYSTEM?

Quite simply, head restraints save racers lives!

If you are unfortunate enough to be involved in an accident during a race and you are wearing a head restraint system, then your seatbelt is likely going to do its job and stop your body from moving forward. The head restraint will do its job and stop your head from whipping forward and placing enormous strain on your neck. A racer's head is made heavier than normal by the added weight of a helmet. Frontal impact in a race car can cause Basilar skull fractures which are often fatal and have taken the lives of some of history's greatest racers. Keep in mind that it isn't necessarily how fast you are going but how fast you stop that causes some of the worst injuries.

HOW DO THEY WORK?

Both HANS and Hybrid head restraint devices work by using shoulder harness friction to resist forward head movement and ensure proper rotation during rapid forward deceleration.

DO I NEED TO USE A SPECIFIC SEATBELT HARNESS?

No, but the configuration of the seatbelt harness is critical and some head restraints are tailored for use with a FHR specific seatbelt harness. The shouldner strap mounting points should be even with the shoulders such that the straps make an angle of 10° to the horizontal. The mountings points must be equally disposed about the user's centreline so that straps spread inward slightly from the mountings and around the FHR's. This helps to keep the straps firmly engaged with the FHR's.

WHICH DEVICE IS RIGHT FOR ME?

The HANS is a yoke style device and the Hybrids use straps, much like a backpack design. In short, you should choose the device that is most comfortable to you. Every head restraint device sold by Simpson is certified and approved by either the FIA, SFI or NASCAR. Some devices hold multi-certifications.

Our customer service staff is on standby to assist you with fit or to answer any questions.

HYBRID PRO LITE

The Hybrid Pro Lite[®] is the ultimate in safety and comfort. The Hybrid Pro Lite's new light-weight design and carbon fiber construction provides maximum comfort and maneuverability with superior strength. All of Simpson's Hybrid Series head restraints are designed for easily exiting the car without the danger of being entangled in other gear by offering the lowest profile of any comparable device. This device comes with optional patented SAS (Seatbelt Anchor System) for even greater coverage in flips, barrel rolls, and side impacts. When the worst happens, you'll have the same great protection every time.

FEATURES

Ships race ready with Quick release and D-ring Helmet Anchors

The Hybrid S is FIA approved and SFI certified. It is tested to FMVS 208 and shown to be compatible with 3-point harnesses used by Car Club enthusiasts and High Performance Driving Experiences. This allows driving instructors, auto manufacturing test engineers, and other cars with 3-point harnesses to have added protection. We are pleased to offer protection to this sector of the market, however, Simpson's top concern is your safety. For the BEST protection on the racetrack, we suggest a Full-Containment Cockpit System that includes a Full Containment Seat, Snell rated helmet, SFI or FIA approved head restraint, and 7-point seatbelt harness system.

FEATURES

- FIA approved, SFI certified
- High quality carbon fiber construction
- Low profile. No high back to hook on the bars on exit.
- Multiple load paths to dissipate head loads
- Buckle attachment in front. No bulky straps underneath.
- Ships race ready with post clips
- Seat belt anchor system
- Helmet anchors available for upgrade

HYBRID SIZING CHART

CHEST STRAP WITH DRIVING SUIT ON

HOW TO MEASURE

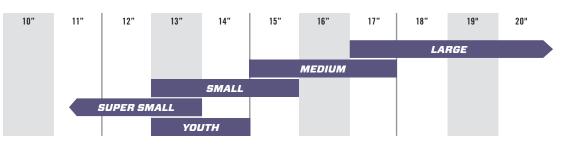

- 1. Measure around chest below pectoral muscles.
- 2. Measure with driving suit. If not available add 1" to measurement.
- 3. Take measurement with tape placed against driver with out any slack and without pulling the tape tight.
- 4. Once measurement has been determined refer to size charts to device size selection.

*Child and Youth sizes available in Hybrid Sport.

HAUS DERICE SISING CHART

Neck size is the starting point for fitting a HANS Device. You may fit several sizes - comfort is the deciding factor. See HANS selection, beginning page 39.

DuPont[™] Nomex_®

PERFORMANCE & CONFIDENCE

Racing professionals can't have one without the other. That's why they wear racing suits made of DuPont[™] Nomex[®] fiber. In fact, 95% of racers around the world trust the protection of Nomex[®] to keep them safe. It manages extreme heat, yet still delivers incredible comfort, style, and durability – giving them the performance only Nomex[®] thermal technology can provide. Racing suits and apparel made of Nomex[®] fiber help play a pivotal role in providing the valuable seconds racing professionals need to escape fires that result from both on-track collisions and pit accidents.

BUILT IN

Racing gear made of Nomex[®] is inherently flame resistant; the FR (flame resistant) protection is built into the fiber and cannot be washed out or worn away – ever. It won't melt or combust when exposed to flame and actually becomes thicker when exposed to intense heat forming a protective barrier between the heat source and the skin.

TRUST

For more than 30 years, DuPont^m Nomex[®] has been the industry leader around the world in FR protection against the ever present danger of fires at the racetrack.

95% of racers (NASCAR[®], IRL, NHRA, WoO and IHRA) around the world including their pit crews, rescue teams and track officials trust and depend on the FR protection of racing suits made with DuPont[™] Nomex[®].

SUIT TESTING

THERMO-MAN® is the most advanced life-sized thermal burn injury evaluation system in the world today. He can be exposed to various fire hazards through controlled burns to test burn protection properties of garment constructions, fabric weights, material types and garment design styles. Results predict the amount, degree and location of burn injuries that would be sustained by the wearer in a flash fire.

DuPont scientists use this information to help apparel manufacturers develop optimum designs in lightweight, flame-resistant suits that equip drivers, pit crews, rescue teams and track officials with garments that are comfortable and provide the best thermal protection possible.

DuPont™ Nomex[®] is a trademark of E.I. du Pont de Nemours and Company

FULLY SUBLIMATED KART SUIT

Simpson's Non-FR Suits offer the professional look you want both on and off the track. By sublimating directly onto the fabric, we can offer a light-weight suit with endless color and design options. Sublimation reduces your cost by eliminating intricate embroidery. It is a vivid color process that will look as good at the end of the season as it did when you removed it from the box. Unlimited sponsor logos and lettering. Suit features: custom fit and tailored measurements, vertical quilt, choice of collar (banded, soft knit, wrap around), zippered breast patch pocket (not available for styles C/D/F///K/L), epaulets, name embroidery (standard type face on belt: Script), inset front pockets, and colored rib cuffs (Red, White, Blue, Black). Customer to supply vector artwork.

CUSTOM SUIT DESIGN OPTIONS

Custom suit design options, choose your colors from our wide selection.

Our Made-To-Order custom racing suits are made to order per your exact specifications at our factory in the USA. They are SFI approved and feature genuine DuPont[™] Nomex[®] fabric. Our suits provide protection and comfort from over 14 measurements that are uniquely yours for a true custom fit. Our custom racing suits are offered in single layer, 2 layer and 3 layer suits as well as drag racing suits. Try our lumbar stretch panels for added comfort and ease of movement. Our large selection of color choices allows for compatibility with sponsor requirements.

EACH MTO SUIT INCLUDES:

- Custom fit with 14 different measurements -
 - Vertical quilt -
- Choice of collar (banded, soft knit, wrap around) -
 - Zippered breast pocket on select styles -
 - Epaulets with Simpson logos included Name embroidered on front belt –
 - - Inset front pockets —
 - Colored rib cuffs (Red, White, Blue or Black)
 - SFI tags included where mandated –

The suits pictured in our custom suit section are here to show you the multitude of style and material options that are available. When you see the Custom logo next to a racing suit the product is available in custom colors and features. You are not limited by any of these designs in any particular suit style. Design your own suit with the available features below.

DNA SFI.S RACING SUIT

TODAY'S MOST ADVANCED RACING SUIT AVAILABLE IN STANDARD AND CUSTOM

Simpson has developed the DNA racing suit using highly advanced technology combined with industry changing innovations to achieve a suit with almost no restrictions to movement and unbeatable breathability in an incredibly lightweight suit. The DNA suit is constructed to meet the demands of our athletes today and tomorrow. Be one step ahead of your competition and step into the future with the DNA.

FEATURES

- Integrated cuffs replace the traditional cuffs and minimize the material at your wrist and in your glove gauntlet
- Pre-bent 4-way stretch elbows allow for almost effortless movement of the arm helping to reduce fatigue and stop the sleeve from migrating up your forearm.
- 4-way stretch body panels are constructed of a solid piece of high-tech 4-way stretch material this panel that reduces the tension across the back, torso, waist, hips and thighs eliminating excess material and seams while providing excellent ventilation for the entire body of the suit.
- Knee and Inner Thigh Stretch Panels reduce the stress cause by bending the knee allowing for unrestrictive movement of the legs.
- A lower back stretch panel relieves the pull down pressure on the shoulders caused by sitting.
- Stylized outside patch pockets require far less material than a typical inset pocket and eliminate the bulkiness and bunching of an inset pocket
- Embroidered trim adds style without adding any unwanted weight

COLORS: *Red, Blue, Black* SUIT FABRIC: *Titanium Nomex*®

CODE: DNA

INTEGRATED CUFFS replace the traditional cuffs and minimize the material at your wrist and in your glove gauntlet

PRE-BENT 4-WAY STRETCH ELBOWS allow for almost effortless movement of the arm helping to reduce fatigue and stop the sleeve from migrating up your forearm.

SIMPSON SUIT FEATURING

The Crossover suit is SFI.5 rated with multi-layers of fire protection. Simpson branded at epaulets. Banded collar and straight leg cuffs. Slimline design pattern stands out at the track. Attractive back gusset is designed for comfort. Includes 360° arm gussets.

We listened to our female racers, and the Vixen delivers. With protection as our first concern, we began with the finest fabric interior and Shiny Twill outer layer. The Vixen provides maximum protection from burn situations while at the same time delivering style and attention to detail. The design curves smoothly along the body shape with strategic darts, providing less bulk and a sleek silhouette. The front pockets lay flat and special attention has been given to the bust, waist and hip area, offering a proportion that is both desirable and wearable to our female racers.

RATCHET HARNESSES

For when the ride is especially rough and you want to keep those harnesses tightened down. Ratchet Harnesses are available in left side or right side, with Aluminum or Steel adjusters. These harnesses from our Platinum Plus line are manufactured at Simpson's North Carolina facility. In other words, like all Simpson belts, they are made in the USA!

The Simpson D3 Buckle does what no other buckle system can do by providing the ease and convenience of a sewn in harness without the shoulder straps being sewn to the lap belt. Its unique patented design eliminates the two shoulder strap links while still allowing the shoulder straps to be joined at the center of the buckle, truly emulating the V-Shape of a 5-Point Latch & Link System.

FEATURES

- Patented D3 buckle Anti-slip adjusters
- Polyester webbing, anti-submarine belt
- Available in 3"x3" and 2"x2"
- D3, Not SFI Rated

Simpson UTV and off road seat division was born in 2015 when Simpson purchased Twisted Stitch, a Southern California seat company. Simpson has continued with their mission of providing the highest quality and most progressively styled seats available to the off-road industry. Simpson, one of the foremost motorsports safety companies in the world, has taken these seats to an all new level by utilizing racing technology and engineering based on decades of industry experience.

VORTEX

The Vortex seat provides high containment while still allowing for easy entry & exit with its cutaway lower bolster design. It is designed to work with the factory slider without raising the seat height. The Vortex's traditional tube-style frame is mated to a laser cut seat base which utilizes a variety of different modular mounting rails. Optional seat heaters and adjustable lumbar supports are available.

KEY	DESCRIPTION (USE CLOTH MEASURING TAPE)	MEASUREMENTS (INCHES)
A	Neck to wrist. Measure from center of neck (bone) to wrist.	
B	Center back length. Measure neck (bone) to waist (C).	
C	Natural waist circumference. Measure across navel & level across back.	
D	Chest circumference. Measure widest circumference.	
E	Inseam. Measure bottom of rise to ankle (bone).	
F	Collar bone to where crotch seams meet.	
G	Shoulder width. End of shoulder to end of shoulder.	
I.	Measure circumference of waist at beltline where pants are worn.	
J	Hips. Measure largest circumference around hips.	
K	Thigh. Measure 2" below crotch.	
М	Rise. Measure front to back waist. For 1 piece suit, same measurement points as C. For 2 piece suit, same measurement points as I (where pants are worn).	
N	Neck size	
0	Height	
Р	Weight	
Q	Bra Size (for womens suit sizing)	1
