

SKF Drive shaft support bearings

Rugged SKF drive shaft support bearings are built to meet or exceed OE specifications. They are also built on the years of experience that SKF has earned designing and supplying bearings to the world's largest OE manufacturers.

Engineered and manufactured to specific application requirements that deliver precise drive shaft alignment and support.

Drive shaft support bearings are pre-lubricated and sealed with metal reinforced seals to prevent contamination.

Rubber support cushions are manufactured from durable rubber compounds that provide maximum support while isolating the driveline shaft from damaging vibration.

Drive shaft support frames are constructed from high quality steel or aluminum that provides additional strength and long life in harsh environments.

Featuring over 90 SKU's, SKF drive shaft support bearings offer broad coverage for most popular passenger cars and trucks. For many applications, brackets and slingers are included where necessary.

SKF part no.	Application
HB20.....	1981-1987 Isuzu light duty trks.
HB21.....	1981-1982 Chev/GMC trks., vans & SUVs
HB106-FF.....	1986-1989 Ford trks., vans & SUVs
