

Forged, not sprayed.

SmartCap is forged from strong automotive-grade stainless steel. The EVO holds up to 330 lbs when moving and a whopping 770 lbs when parked. That's heavy duty.

The world's first modular designed truck cap.

Our unique 5-piece modular design means you can purchase your new SmartCap EVO online. SmartCap ships directly to your home and can be easily installed in under an hour.

Grand opening.

SmartCap's Gullwing Door openings are approximately 17% taller than most fiberglass caps—making it easier to access your cargo or slide in a SmartComponent.

Create your own workspace – and playspace.

SmartComponents let you organize your truck bed exactly how you want it. Drop in a Full-Bin for your tools on one side and a CampKitchen for dinner under the stars on the other.

A truck cap for all seasons.

Rain, snow, freezing temps – bring it! SmartCap's 5-piece design includes an innovative sealing method that when properly installed makes the SmartCap completely weatherproof, come hell or high water.

The truck cap that thinks it's a convertible.

Put it on. Take it off. Put it on. Take it... you get the idea. The SmartCap comes on or off in just 15 minutes—giving you the flexibility to haul taller loads.

A breath of fresh air.

The Positive Pressure Air Vent filters fresh air into the cap at a greater velocity than the enclosed bed is capable of sucking air in. This keeps road dust outside, rather than all over your stuff. Whew!

The perfect fit.

Our design team strictly adheres to the manufacturers' approved fitment guidelines – to ensure your SmartCap is perfectly fit to your late model Ford, GM, RAM or Toyota truck. We're very good at crossing T's and dotting I's. Which makes us the perfect companion for the back of your truck.

A portal of light.

For all full-size SmartCap applications, we've designed a portal window* that allows your truck's third brake light to illuminate the bed. Good thinking! *Not available on mid-size applications.

Mount up.

Sleekly designed into the top of the SmartCap, our integrated Roof Rails allow you to utilize other SmartComponents for mounting rooftop tents, bikes, kayaks, ladders—you name it. Plus, if you already own a rack system, no problem. SmartCap is universally designed to mount just about anything. Brilliant, top to bottom.

Real attention grabber.

The SmartCap incorporates a high mounted third brake light that's a real attention grabber when slamming on the brakes. You never know, there might be a Zebra Crossing ahead.

Three year warranty.

We provide a 3-year comprehensive warranty on all SmartCap parts and workmanship. Customer satisfaction is guaranteed.
