

Model No. BA227 12V Digital Battery Tester with Printer

Specific testing regimens for a wide variety of battery types:

Model No. BA227 12V Digital Battery and Electrical System Tester with Integrated Printer

The BA227 offers a complete testing solution for 12 Volt batteries and systems. Compatible with a wide variety of battery types, the BA227 is designed to test flooded, AGM flat plate, spiral wound, gel cell, start-stop AGM and enhanced flooded batteries. It features 36" cable leads, replaceable cable ends and temperature compensation.

Testing is quick and easy, as the tester intuitively walks the operator through the testing process. The integrated printer enables easy service documentation. Its backlit screen allows effective testing in all lighting environments. Plus, with the ability to test batteries from 100-1400 CCA, you can test everything from powersport batteries to Group 31 batteries.

Features:

- 6.5V-15V Operating Range
- 100-1400 CCA Capacity
- 12 Volt Battery and System Testing
- Temperature Compensation
- Long 36" Leads
- Backlit Display
- Multilingual Operation

Testing is quick and easy and allows the operator to perform either a battery test, system test or both. The tester walks through the testing sequence, prompting for key pieces of information and guiding the operator from one step to the next. The tester provides accurate assessment of both charged and discharged batteries, saving time and effort.
