Memory Saver Connector

The Vehicle Memory Saver Connector, **Model No. ESA30**, can be used in conjunction with a jump starter to preserve vehicle codes and electronic presets while a vehicle's battery is disconnected.

Key features include:

- Turns any jump starter with a 12V power port into a memory saver.
- Interface connector between a jump starter and a vehicle's OBD II port.
- Prevents electronic memory loss when disconnecting a vehicle's battery.
- LED confirms a proper connection has been made to the OBD II port.
- 90 Day Limited Warranty.
