

Warranty

Soul Performance Product Warranty

Soul Performance LLC provides the original owner with a lifetime warranty for all products we manufacture covering materials and workmanship. We always strive to source and build the best products while providing the best workmanship and we want our warranty to reflect that.

We will replace or repair at our expense any defective product.

Catalytic converters have a three (3) year warranty and are covered except when used with leaded race fuel or any type of fuel additive. Such non-manufacturer specified fuels will damage any catalytic converter and warranty is voided when these fuels and additives are used.

- Catalytic converters that have failed due to track usage (non race fuel use) for the first time will be repaired or replaced by Soul, or the option to apply credit towards a catless equivalent product will be available.

Sound is not covered under any warranty. We will do our best to meet expectations but sound is subjective. There are ways to adjust sound level and we will work with you to find the right one for you.

Soul Performance LLC under this warranty, in any event, will not be liable for loss of use, inconvenience, consequential or resultative damage. Our soul obligation under this warranty shall be limited to repair or replacement of our product.

Product warranty applies to the original purchaser on record, for the original vehicle on which the product was installed.

All products we retail from other sources shall have the warranty provided by that manufacturer or distributor.
