

PART NO. 86370

Instruction Sheet

GM FULL SIZE VAN CAMBER PLATES

This part should only be installed by personnel who have the necessary skill, training and tools to do the job correctly and safely. Incorrect installation can result in personal injury, vehicle damage and / or loss of vehicle control.

1. Take alignment reading to determine if caster/camber change is needed.
 2. Raise and support vehicle by lower control arm.
 3. Remove existing out alignment adjuster cam on the upper control arm.
 4. install No. 86370 cam in the same orientation as the stock cam.
 5. With nut installed but not tightened, adjust camber/caster by inserting 3/8" hex wrench in the square hole of cam.
 6. Tighten nuts to manufacturer's specification and recheck alignment.
