

PART NO. 87310

Instruction Sheet - CAMBER/CASTER KIT

This part should only be installed by personnel who have the Necessary skill, training and tools to do the job correctly and safely. Incorrect installation can result in personal injury, vehicle damage and / or loss of vehicle control.

1. Take alignment readings to determine amount of camber/caster change needed.
2. Raise and support vehicle by lower control arm.
3. Remove existing nuts on O.E. cam bolts and remove square plates.

CAUTION: Use care not to damage brake lines, fuel lines or ground wiring.

4. Install with washer facing the bracket over O.E. cam bolt Replace O.E. nut and snug nut enough to allow for rotation of cam.
5. Rotate the cam from the bolt head side to achieve desired camber/caster readings.
6. Torque cam nut to manufacturer's specifications.
