ABOUT STROUD SAFETY

More than 30 years ago, Bob Stroud took his knowledge of parachutes and safety equipment to the racing industry & created Stroud Safety. Since that time, Stroud Safety has been the technology leader in the safety industry, introducing and acquiring patents on many new items. These efforts by Stroud have made racing much safer for the driver, car, track & spectator.

Stroud Safety started with one product—DRAG CHUTES—and now manufactures more than 150 products. New products are introduced annually from Stroud. Almost every type of racing uses Stroud Safety products, all over the world.

Bob Stroud applies his engineering degree from Oklahoma State University in designing chutes and safety systems. These designs are actively used in safety applications from cars to boats to rockets to aircraft and more. He is an active jumper with over 1000 parachute jumps (many testing his own products), spent 7 years in the Army Special Forces and was an examiner for the FAA.

DRAG CHUTES AND LAUNCHERS

STROUD DRAG CHUTES

Stroud Safety is the leader in the non-rigid aerodynamic decelerator field (i.e. drag chutes). These chutes were designed from the start to be user friendly. Stroud Safety has nearly 50 years experience in parachute design and manufacture. After much exhaustive testing and refinement, the Stroud system was developed.

The Stroud Drag Chute is designed to open very reliably and softly, pull straight, stop sooner and pack very easily by one person in 4 or 5 minutes. The Stroud system does not pull the car off the ground. It pulls low and straight back. With its special deployment system, this chute will open much softer and much more reliably, stopping your car in much less distance than conventional chutes.

Stroud Safety has a chute for every need, with over 50 styles available.

STROUD LAUNCHER SYSTEM

Stroud parachute launchers are the most advanced parachute deployment system on the market. Available in either mechanical or pneumatic styles, the chute launcher completely does away with pilot chutes and their inherent problems. Patented by Stroud Safety, the chute launcher was over 8 years in development. The chute launcher can be used from the slowest bracket car to Top Fuel cars. It is especially effective on 1/8 mile courses, as it is not speed dependent like a pilot chute system. The mechanical system is spring deployed using a regular pull handle. It is ideal for cars that do not have an onboard air system. For those cars that have onboard air, or wish to, then the Stroud pneumatic chute launcher is ideal! It is lighter and easier to use than the spring launcher. Both systems work equally well and the parachute does not know the difference.

If weight is a problem, then the new carbon fiber air launcher is for you. It weighs LESS than a standard Stroud chute with a pilot chute! All Stroud chute launchers come complete with all required mounting and operational equipment. The Stroud parachute launchers work ONLY with Stroud chutes. Using other type chutes is VERY dangerous! Call Stroud Safety for your specific needs.

Fuel/Alcohol Dragster	#450
Fuel/Alcohol Funny	#470

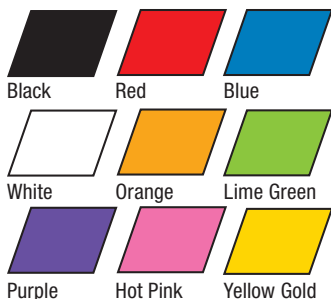

SPECIAL NOTES:

1) Washing your Stroud parachute:

- Remove the pilot chute and deployment bag (or launcher bag if you are using a launcher). You can leave the bridl cord attached to the chute if you are using a pilot chute
- Using a front-loading NON-AGITATOR type washing machine, load the chute inside.
- Add ¼ cup liquid detergent (Tide, Cheer, etc.) plus ¼ cup of Castrol Super Clean (original purple bottle only!) and wash.
- Do not machine dry! Hang up out of the sun and air dry the chute.

2) DO NOT USE the TUBE type parachute mount where the chute attachment loop goes inside a tube and a bolt goes through the tube and loop. This will almost always cut the loop after a few uses. We will NOT warranty any of these repairs!

All of our chute colors available at no additional charge.

STROUD DRAG CHUTE REPAIR: We service and repair all of our own chutes. There is no charge for us to look at your chute and estimate the cost of repair, or if it is repairable at all. However, all freight is the responsibility of the customer. Stroud Safety offers custom design and engineering for numerous applications. If you need something not listed, do not hesitate to call us.

DETERMINING DRAG CHUTE SIZE: Stroud chutes are specifically designed based on vehicle weight and speed. Stroud recommends that customers consult a qualified technician to confirm the size required for their particular specifications. Use the following charts to help determine what your drag chute needs are going to be.

These charts are only a guide!

BALLISTIC BLANKETS & RESTRAINTS

ENGINE DIAPERS

Originally designed by Stroud Safety, the Engine Diaper comes in either the SFI 7.1 Kevlar style or the 7.2 ballistic nylon sportsman style. Use a Stroud Engine Diaper to keep parts and pieces away from places they don't belong! Available for all engine and oil pan combinations, for all type cars.

ENGINE DIAPER COMPLETE

Engine Diaper comes in the SFI 7.1 Kevlar style.

Engine Diaper - Complete 7.1 #1020

ENGINE DIAPER COMPLETE

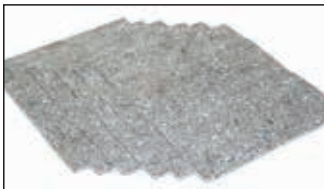

Engine Diaper comes in the 7.2 ballistic nylon sportsman style.

Engine Diaper - Complete #1000

ENGINE DIAPER PADS ONLY

Engine Diaper for either the SFI 7.1 Kevlar style or the 7.2 ballistic nylon sportsman style.

Engine Diaper - Pads Only #1015

SUPERCHARGER RESTRAINTS

SFI approved Supercharger restraints for almost all applications. Remember, we recertify all our own restraint systems.

SUPERCHARGER RESTRAINT 14.1

The 14.1 unit is for the bracket racer that needs minimal restraint. Complete, with header mounts and adjustable straps and fits either a 6-71 or 8-71 supercharger. Other sizes are also available.

Blower Restraints (SFI 14.1) #1610

SUPERCHARGER RESTRAINT 14.2

The 14.2 unit fits 6-71, 8-71, 10-71, 12-71 and 14-71 blowers. Kit consists of top plate, blower bag and all fittings to attach to the motor. Blower strap anchors are new Stroud type, with the strap having the locking pins sewn to it, preventing the loss of the locking pins.

LENCO TRANSMISSION BLANKETS

Stroud Safety has a full range of SFI approved transmission blankets. Available in ballistic nylon or the lighter and thinner Kevlar, Stroud transmission blankets fit all transmissions on the market. Stroud blankets come with carry handles that make moving the transmission easier. CS1, CS2, and CS3 available for all Lenco blankets.

LENCO BLANKET 1

Lenco Reverser Blanket	#508
Kevlar Lenco Reverser Blanket	#5087

POWERGLIDE, UNIVERSAL AND B&J TRANSMISSION BLANKETS

Stroud Safety builds SFI approved transmission blankets that fit every type of transmission. These blankets fit the standard Powerglide transmission, or the Turbo 350, 400, etc. transmission. They bolt to the belt housing, ensuring that they stay in position.

POWERGLIDE TRANSMISSION BLANKET

Fits the popular Powerglide transmission.

Powerglide Blanket	#515
Kevlar Powerglide Blanket	#5151

UNIVERSAL TRANSMISSION BLANKET

Fits turbo 350, 400, and 727 transmission.

Universal Blanket	#516
Kevlar Universal Blanket	#5161
B&J Blanket	#520
Kevlar B&J Blanket	#5201

FIRE SUPPRESSION SYSTEMS

STROUD SAFETY FIRE SUPPRESSION SYSTEMS

Stroud Safety offers a versatile range of fire suppression delivery systems for all motorsports applications. We have the sizes, accessories, and components for your needs.

FE-36 FACTS

One pound of FE-36 discharged for every 50 cubic feet of enclosed volume will achieve a 5% concentration in the air. This is sufficient to extinguish most fires with a substantial margin of safety. Stroud Safety systems are designed to achieve the concentration within ten seconds, whereupon combustion cannot occur.

Any size of enclosed area will be protected as long as a 5% concentration of FE-36 is present. Once the agent is diluted with fresh air to below the 5% concentration, the system begins to lose its effectiveness.

FE-36 has proven effective on the flammable portions of Class A fires (wood, paper, etc.), Class B fires (flammable liquids and gases) and Class C fires (electrical). It has also been found effective on deep-seated Class A fires if sufficient soaking time is allowed to dissipate the heat.

**Other Agents available,
call for information.**

5# FE-36 System	#9302
10# FE-36 System	#9352
FE-36 Refill (priced per pound)	#9355

All 5# and 10# systems include the following: bottle, head, mount, clamps, 8' pull cable, 2 – 3-port (or 180°) nozzles, 1 – 6-port (or 360°) nozzle, fittings, and 12.5' of tubing.

STROUD SAFETY NETS

SAFETY NETS

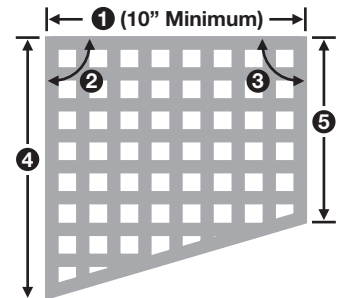

Manufactured in our facility in Oklahoma, in standard sizes or custom designed to your specifications, using the best materials to meet or exceed SFI specifications.

ALL SFI nets must be re-certified every 2 years!
We re-certify all Stroud Safety products.

IMPORTANT CUSTOM WINDOW NET MEASUREMENT NOTES

- 1 Top width. All window nets **MUST** be a minimum of 10" wide per SFI.
- 2 Upper left angle. We must have the angles (90°, 75°, etc.) in the upper left and upper right corners to make the net fit properly.
- 3 Upper right angle.
- 4 Left height.
- 5 Right height.

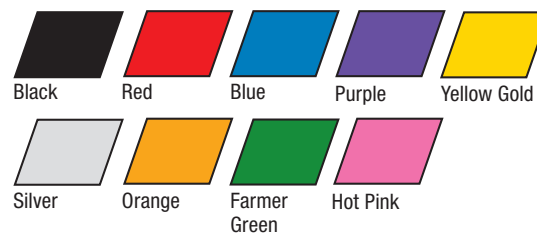

We need to know how the net mounts to the car, i.e.: horizontal rods, buckles and grommets, etc. Your measurements **must** include the mounting hardware.

Be sure to select the color of the net.

Note: be sure to indicate which measurement is your "vertical."

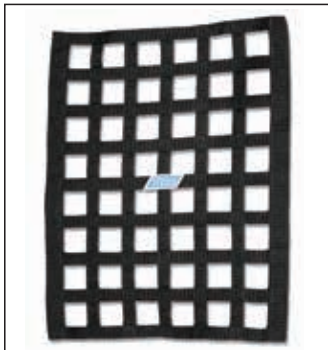

CUSTOMIZE YOUR LOOK!

All of our colors available at no additional charge.

HELMETS, APPAREL, NOMEX, FIRE BLANKET, COOL VEST

BELL SPORT HELMET

Designed for the sportsman or entry level racer who demands value and quality at an affordable price, the Snell SA2010 rated Sport offers full face protection and a standard size eyeport.

Bell Sport #815

NECK COLLARS

The Stroud neck collar is made with ultra soft knit Nomex outer covers and flame retardant closed cell foam on the inside. They are SFI approved and come in black, red and blue.

Neck Collars #300

Standard neck collar colors available:

STROUD FIRE BLANKET

Stroud has designed a piece of safety equipment that should be a staple for every race team, track crew, shop, and home. Manufactured with fire-resistant Nomex, sewn with Nomex thread and reinforced with nylon stitching, this heavy-weight blanket is perfect in a fire emergency to quickly help smother a fire on an individual or equipment. Shipped with a convenient storage bag, the Stroud Safety Fire Blanket opens to over 25 square feet.

Fire Blanket w/bag #Fire Blanket

PREMIUM DRIVING GLOVES

We've developed the finest driving gloves using the thinnest SFI approved material available. These gloves have thin Nomex on the outer index finger and thumb for maximum feel. Available in red, black and blue. Sizes: S, M, L, XL, XXL.

Driving Gloves SFI 3.3/1 #1100

Driving Gloves SFI 3.3/5 #1110

Driving Gloves SFI 3.3/20 #1130

DRIVING SHOES

Stroud Safety Driving Shoes are designed for drivers by drivers. SFI approved, they are both comfortable and long lasting.

Driving Shoes #1200

FUNNY CAR BOOTS

These funny car boot have their own hard sole. You don't need to wear shoes on the inside. They are the most comfortable boots on the market.

Sizes are same as regular shoes. Full sizes only, no half-sizes.

Funny Car Boots with Sole SFI 3.3/20 #814

NOMEX HEADSOCK

The Nomex headsock provides protection for the head and neck. One size fits all. Available in two and one hole.

Nomex Headsock #820

COOL VEST

For those hot summer days when you feel like melting, the Stroud Cool Vest cures the heat. Reusable all day and does not interfere with your driving. Also keeps you warm in the winter!

Cool Vest #810

NOMEX SOCKS

For added protection in the race car, Stroud Nomex socks fit the bill. Natural color only, various sizes.

Nomex Socks #840

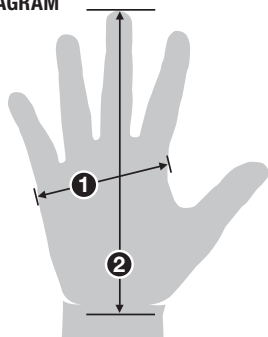

COOL COLLAR

For those hot days when you need all your reaction times, the Stroud Cool Collar helps keep your head cool. Light weight and reusable all day.

DIVE MAT

Keep comfortable while working on the ground with this dive mat. Made with durable vinyl covering & soft foam liner.

Dive Mat #805

SFI ROLL CAGE PADDING

Comes in 3' sticks & fits 1-5/8" tubing.

SFI Roll Cage Padding #550

PEDAL BOOT

Stroud Safety pedal boots are lined with Banox to make them fire retardant. Available in black only.

Pedal Boot #540

MACHINIST APRON

Stroud Pit Aprons are made with fire retardant cotton to protect you from flash fires. They offer an adjustable waist and neck, with quick release buckle. Each apron is equipped with three large pockets at waist level to hold tools, parts and other odds and ends used when working on your car. Available in black, red or blue. Custom monogramming available.

Machinist Apron #8040

EQUIPMENT BAG

The Stroud equipment bag is just the right size to carry firesuit, driving shoes and gloves to the track. Comes in black only.

Equipment Bag #806

PLUG WIRE COVERS

Stroud Wire Covers protect the plug wires after the burst panel has been blown. They are designed so that plug wires won't have to be replaced.

Wire Covers #812

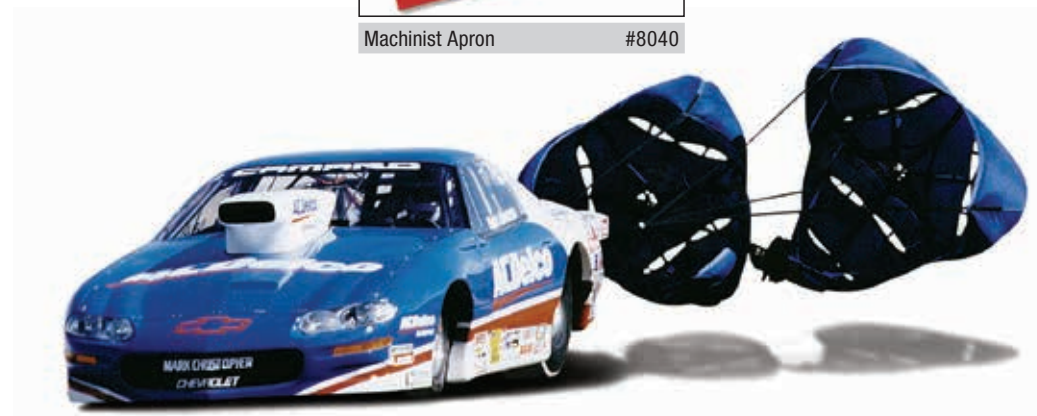

STROUD SAFETY RE-CERTIFICATION SCHEDULES

Stroud Safety reminds you that SFI re-certification is required at specific intervals for many of the products that you use in competitive motorsports.

We re-certify ALL Stroud Safety products!

All Window Nets	Every two years
Personal Restraints	Every two years
Fire Suits (SFI 15 & 20 only)	Every five years
Transmission Blankets	Every two years
Blower Plates	Every two years
Tractor Blankets	Every two years
Engine Diapers	Every two years

COULD YOUR TRACK BE SAFER?

LET YOUR TRACK KNOW ABOUT THE STROUD TRACK SAFETY PACKAGE

The Stroud Track Safety Package can be designed to meet the needs of any racing facility... pass it on!

- Barrier and Catch Nets
- Crew Fire Suits and Apparel
- Fire Blankets
- Tow Straps and Much More!

"We are very pleased with Stroud Safety as the supplier of protective clothing for our safety team. It is important to us that the team has the best protection available.

Our team is confident that their Stroud suits are track proven in terms of safety, durability, and style.

Also, coordinated suits and colors help participants easily identify our professional safety team on the track which improves emergency response times significantly."

— Darren, Santa Pod Raceway, England
