

THINKDIAG

1 Download the ThinkDiag App

Search for "ThinkDiag" in the App Store or in Google Play Store. The ThinkDiag App is FREE to download.

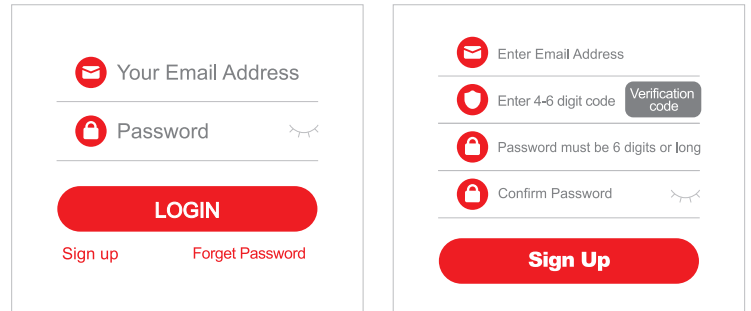

2 Login or Sign Up

If you already have a Thinkcar Tech account, please LOGIN with your credentials. If you do not have an account, please sign up as instructed in the following paragraph. Please note that one Thinkcar Tech account is in common use for all products by Thinkcar Tech.

How to Sign Up for an Account:

Open the ThinkDiag App, click on "Sign Up". Input your username, email, and verification code (which will be sent to the email you input), then create your own password. Click on "Sign Up" to finish your registration.

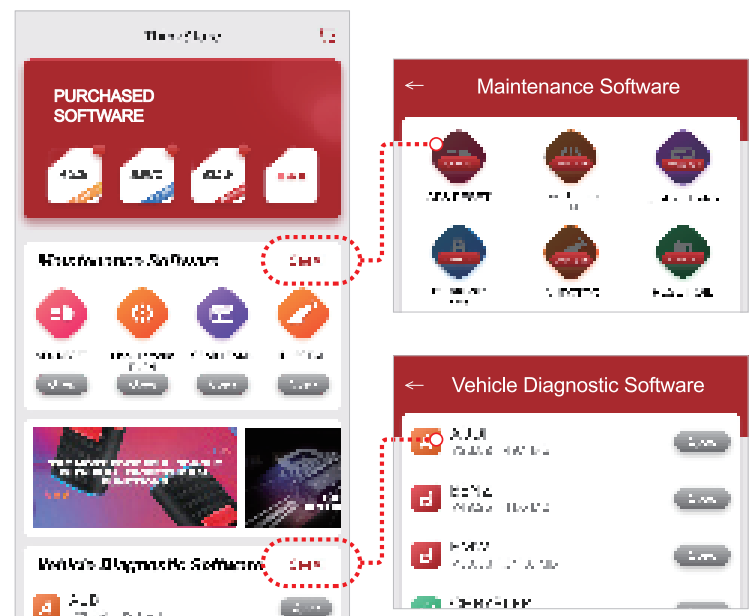

3 Activate a ThinkDiag Device

After your registration, you need to input the serial number and an 8-digit activation code, for your ThinkDiag device.

4 Download Diagnostic Software

After activating your ThinkDiag device, as explained in the previous part, go to the "ThinkStore" to download the diagnostic software. Please select the software that corresponds to your vehicle.

5 Plug ThinkDiag Device into the OBDII port in your vehicle:

Usually, the OBDII port is located under the dashboard, above the pedal on the driver's side. Here are the 5 common positions for the OBDII port (as shown in the figure below). Plug ThinkDiag device, there will be a green light which indicates the device is powered on.

6 Bluetooth Connection

Open the ThinkDiag App, it will automatically search for activated devices, select your device and connect to it via Bluetooth in the App

7 Start to Use Your ThinkDiag Device

After the bluetooth connection, you can use all the functions of your ThinkDiag device, such as: All Systems Diagnostics, Maintenance&Service Functions, OBD II Diagnostics, Thinkcar Remote Diagnostics.

8 FAQ

- Q: What do the different lights on ThinkDiag indicate?
A: There are four different lights on ThinkDiag:
Continuous Green Light: ThinkDiag device is powered on.
Continuous Blue Light: Bluetooth is connected.
Flashing Blue Light: Bluetooth is in communication.
Continuous Red Light: Firmware upgrade successful or firmware upgrade failed.
- Q: Why do I need to download the diagnostics software after downloading the App?
A: Due to a variety of vehicle manufacturers on the market, different vehicle manufacturers require corresponding diagnostic software. Therefore, ThinkDiag will recognize the vehicle manufacturer first while diagnosing, then it will download the corresponding diagnostic software to work.
- Q: What vehicles can ThinkDiag diagnose?
A: ThinkDiag supports diagnoses more than 100 vehicle brands. The diagnostics software for the different types of vehicles, is available in the ThinkStore in the ThinkDiag App.
