Four System enhanced Diagnostic function (ENG/AT/ABS/SRS)

It is specially designed to add benefits of reading/clearing error codes and reading DataStream for 4 following systems:

- 🏆 ENGINE: Easily determine the cause of Check Engine Light, and turn off the warning light.
- 🏆 ABS: Perform various bi-directional tests to check the operating conditions of Anti-lock Braking System (ABS), and turn off the warning light.
- 🏆 TRANSMISSION: Retrieve the error information from Automatic Transmission (AT) which is a type of motor vehicle transmission that can automatically change gear ratios as the vehicle moves, freeing the driver from having to shift gears manually.
- 🏆 SRS: Retrieve and clear codes in Supplemental Restraint System (SRS), and turn off the warning light.
