

# THINKSCAN

## Quick Start Guide

### Register & Update

Prerequisite conditions:

1. Go to mythinkcar to download the update tool and install it on the computer.
2. System requirements: Windows XP, 7, 8 or Windows 10.

Follow the steps below to update the tool:

1. Note down the Serial Number and Register code.
- 1). Connect one end of the USB cable to your tool, and the other end on the computer.
- 2). After the tool has powered up and entered the main menu screen, move the highlight bar on the "Help" icon and press [OK].

- 3). Highlight the "Tool Information" in Fig. 1 and press [OK].

- 4). Write down the Serial Number and Register code for later use.

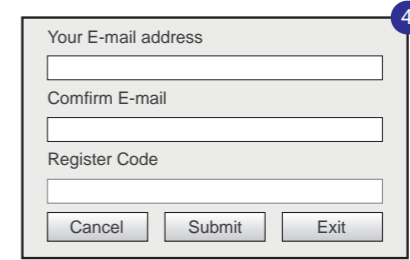

2. Register the scanner on the update tool (for initial use).

- 1). Launch the update tool, a screen similar to Fig. 3 will appear:

*\*Note: Once the S/N is entered, "Restore System" becomes activated, which is used to restore system if a new memory card is replaced.*

- 2). Select the target language and enter the Product Serial Number, click [Device Upgrade], a screen similar to Fig. 4 will appear.

- 3). Enter the required E-mail address and Register Code, click [Submit] to finish the sign-up.

*\*Note: For initial use, user needs to go through a registration process. Once you finished it, the registration screen will not appear again each time you click the [Device Upgrade] button in the future.*

3. Copy the update package into the memory card.

- 1). Install the memory card from the tool into the supplied memory card adaptor and insert into the USB port of the computer.
- 2). Reopen the update tool, select the updates you would like to perform or click "Select All", and then click [Download] to start downloading the update package into the memory card.
4. Reinsert the memory card into the tool and start update.

- 1). Once all steps are complete, find the memory card slot on the tool and reinsert the memory card into the tool.

- 2). Connect the tool to the computer via USB cable.

- 3). The tool starts verifying the consistence of the local files with the files in the memory card. If difference exists, the tool will automatically start updating and a green update progress bar will appear on the bottom of the screen. Be patient to wait until the update is completely finished.
