* 1. All performance results are based on third-party commissioned tests for snow conditions, tread life and noise using vehicles equipped with 225/45R17 tires. Results were measured when tires were new, at 16,000 kilometers, and at 22,000 kilometers. Tires were driven and tested under controlled conditions.
2. Based upon mileage projection of test results. Individual results may vary depending on vehicle type, vehicle and tire maintenance, driving style and road environment.
Although the Proxes 4 plus performs better than a leading competitor's tires in snowy conditions for ultimate safety Toyo Tires always recommends the installation of 4 winter tires during cold weather conditions. Winter tires are designed specifically to handle conditions such as cold temperatures, snow, ice and slush
