INSTRUCTION PROCEDURE

- 1. Remove the factory installed rear bumper. Raise the TrailFX bumper up into place and align the (4) holes on the frame with the holes on the hitch plate on the bumper.
- 2. Install the M12x110mm hex bolts to secure the hitch plate to the rear frame. Should be kept loose at this time.
- 3. Install the M12x35mm hex bolts on the driver's side, on the passenger side. Level the bumper and torque the bolts.

- 4. Place washer over rear bumper post, then place tire carrier on top, then another washer. Once the tire carrier has been place over post, swing it to the closed position and latch it into place. Secure it with the already installed bolts (No Washers).
- 5. Install the tire carrier connecting plate at the end of the vehicle and secure to the holes in the bumper using the supplied bolts, washers and hardware.
- 6. Carefully place the plastic block on top of the post over the tire carrier portion.
- 7. Connect the tire carrier and the connecting plate with tie rod assembly
- 8. Locate tire mounting bracket on the tire carrier by guiding the bracket studs into the holes on the tire carrier. Determine the best position for your tire size and then tighten all hardware on mounting bracket.
- 9. Re-Install any previously unclipped wiring harnesses.
- 10. Installation completed.

A: Install Rear Bumper

Install Rear Bumper

M12x110x4 Bolts M12x37x3x8Flat Washers M12 x4 Spring Washers

STEP 2

Put C type connecting plate into the passenger side

PRODUCT CARE

- Periodically check the product to ensure all fasteners are tight and components are intact.
- 2. Regular waxing is recommended to protect the finish of the product.
- Use ONLY Non-Abrasive automotive wax. Use of any soap, polish or wax that contains an abrasive is detrimental and can scratch the finish leading to corrosion.
- Aluminum polish may be used to polish small scratches and scuffs for Stainless Steel finish. 4.
- Mild soap may be used to clean the product for both Stainless Steel and Black finish.

FAQ's

Mounting bracket are not getting Installed properly.

In some cases Illustration images shown in Installation manual may not be the exactly same as per actual vehicle images ,also if Driver / Passenger side mounting brackets are very identical in the design, suggest referring Parts Identification guide to avoid fitment issue.

Products are thumping / rattling after installation.

Please ensure that all required mounting brackets / hardware's are installed & tighten correctly. Suggest using white lithium / regular grease between the metal to metal contact surfaces.

Missing / Excess Hardware.

Recheck hardware count as per the part list.

Product not installing properly.

Ensure make model year, cab length and bed size of your vehicle is listed in the application. All installation steps are followed correctly.
