

**PART #4810 (WITHOUT PADS)  
& 4840 (WITH MOUNT PADS #9525)  
283-350 SMALL BLOCK CHEVY OR 454-502  
BB CHEVY UNIVERSAL FRAME MOUNT**

This universal frame mount uses stock style rubber motor mount pads, or Trans-Dapt part #9525.

If additional lift for clearance is desired, or if a steel mount is required for racing conditions, or extra hard use, we recommend Trans-Dapt motor mounts part #4126.

If you need a universal transmission crossmember mount to support most standard and automatics we recommend Trans-Dapt part #4539. It is adjustable for use in open channel frames with widths of 26" to 36" between rails. It also has a 3" drop in the center area.
