

80-Gallon Refueling Tank

The convenience of a diesel fuel station in the bed of your truck!

Fill your fuel needs with a safe, legal, and reliable refueling tank from Transfer Flow! Our refueling tanks are rugged and durability-tested to hold up to daily use.

Transfer Flow's 50- and 80-gallon refueling tanks are legal to carry non-combustible fuel, including diesel. Each tank includes two internal baffles to reduce fuel sloshing, and fully-welded mounting brackets.

The refueling tanks are made from 14-gauge U.S. aluminized steel, for superior durability and strength, and powder coated black for durable finish. Refueling tanks come with fuel cap, bolts, nuts, washers, bed shims, and installation instructions. Pumps sold separately.

Compatible with GPI® and Fill-Rite® 15-GPM refueling pumps.

FEATURES AND BENEFITS

- Refueling tank to fuel diesel vehicles and equipment
- Built from 14-gauge U.S. aluminized steel for durability
- Comes with fuel cap, mounting kit, and instructions
