TYC #: 800034P

Estimated Time : 10 min.

Replacement for OEM
79831-S2A-003

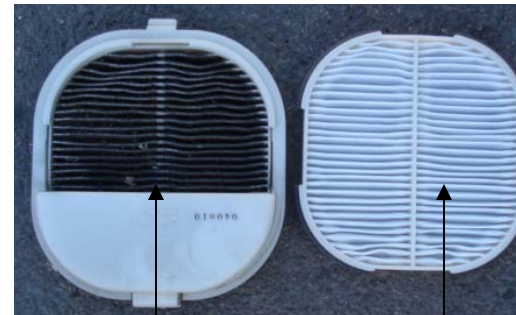

00-08 Honda S2000

1. The filter is located in the engine bay, under the windshield on the passenger side. Pull away rubber lining on the plastic cowl cover. Remove the bolts securing the windshield wipers, remove wipers and lift up the plastic cowl cover.

2. The filter frame is found under the plastic cowl cover. Reach in, pull up the frame and then slide it outwards to remove.

Old filter in frame

Replacement new TYC filter

3. Remove filter from the filter frame, install new TYC filter into existing frame. Ensure that Air Flow arrow is pointing down.

4. Reinstall filter and frame into vehicle in reverse order.
