

# TYC™

## CABIN AIR FILTER

- ▶ Cleaner Air for Passengers
- ▶ Enhanced HVAC Performance
- ▶ Easy Installation, Perfect Fit

**TYC #: 800083C**

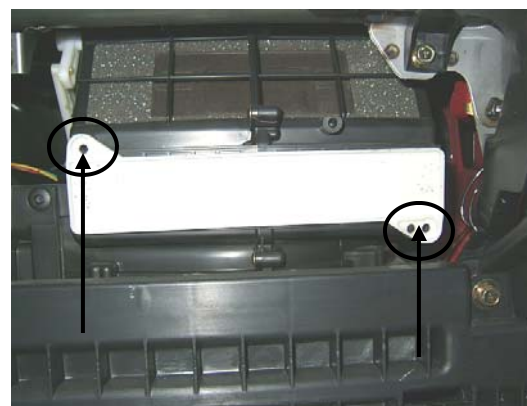

Estimated Time : 10 min.

Replacement for OEM  
MR398288

**02-07 Mitsubishi Lancer** / Evolution  
03-06 Mitsubishi Outlander

1. The filter is located behind the glove compartment. Push in on the sides of the glove box while pulling down to disengage the latches. Allow box to swing down on its hinges.

3. Insert in new TYC filter, ensuring that the Air Flow arrow is pointing down, and that the frame is aligned with the housing's mounting screw (at opposite corners). Screw in the mounting screws to secure filter.

4. Reinstall in reverse order.

2. For first-time installation\*, the filter housing is sealed. Use a sharp knife to cut the cover along the lines to form a rectangular opening. Remove and dispose the cut out cover.

\* For vehicles that already had the filter cover removed, unbolt the 2 screws at opposite corners (circled above) of the filter frame and slide out the old filter. Replace with new TYC filter and secure with the 2 mounting screws.

Installation guide pictures are from the **BOLD** vehicle model.
