WHY TYGER?

THE QUALITY YOU CAN TRUST.

To ensure perfect quality for our stainless steel bars, we only use marine grade #304 stainless steel for the highest standard of rust and corrosion resistance. Meanwhile, some similar products in the market reduce their costs by using lower grade “stainless” materials like #201.

RESULTS AFTER SALT SPRAY ANTI-RUST TESTING

96 Hours on #304

64 Hours on #201

RESULTS AFTER 3 MONTHS OF DRIVING IN SNOW CONDITIONS

Marine Grade

Cheaper “Stainless”

WHY TYGER?

THE QUALITY YOU CAN TRUST.

To ensure the perfect finish of our black bars and for better rust resistance, we focus every procedure during production including E-Coat and the Pre-treatment before the Black Powder coating. Meanwhile, some similar products in the market reduce their costs by ignoring our first two key procedures.

HOW WE DO IT

- ① Pre-treatment to remove impurities
- ② Special "E-Coat" Inside & Out
- ③ Dual-Stage Matte Black Powder

E-COAT

Consistency - uniform density
Durability - 1000Hrs+ of salt spray resistance
Electrodeposition - uses electrical current to deposit the paint

PRE-TREATMENT

Phosphate- a smoother & stable surface
Acid Washing - removes rust
Oil Degreasing - rust and corrosion resistance.

RESULTS WITHOUT PRE-TREATMENT AND E-COAT

Paint bubbles

Rust dust

Rely on premium grille guards and bull bars by Tyger if you're looking for quality and efficiency.
