

WHY TYGER?

THE QUALITY YOU CAN TRUST.

To ensure the perfect finish of our black bars and for better rust resistance, we focus every procedure during production including the Pre-treatment and E-Coat before the Black Powder coating. Meanwhile, some similar products in the market reduce their costs by ignoring our first two key procedures.

HOW WE DO IT

- 1 Pre-treatment to remove impurities
- 2 Special "E-Coat" Inside & Out
- 3 Dual-Stage Gloss Black Powder

PRE-TREATMENT

Phosphate - a smoother & stable surface
Acid Washing - removes rust
Oil Degreasing - rust and corrosion resistance.

E-COAT

Electrodeposition - uses electrical current to deposit the paint
Consistency - uniform density
Durability - 1000Hrs+ of salt spray resistance

RESULTS WITHOUT PRE-TREATMENT AND E-COAT

Paint bubbles

Rust dust

Patented stars step pad design.

Heavy duty metal tubes with seamless welding for a sturdy structure.

Rust resistant E-Coating textured black finish.

Sealed end caps for water & dirt resistance.
