

Ford/Mazda Truck Calipers

10-3200S/10-3201S

10-3260S/10-3261S

The 10-3200S/10-3201S calipers fit Ford Explorers and Rangers and Mazda B-Series pickups from 1995-2001. In 2002 the vehicles changed to the 10-3260S/10-3261S calipers. ***These calipers are very similar and can be used interchangeably.*** However, the 10-3200S/10-3201S casting allows for a bottom pad clip to be installed and, as a result, uses the 652 pad. The 10-3260S/10-3261S casting does not allow for this pad clip and, as a result, uses the 833 pad.

While the change to this braking system appears to have been made starting with the 2002 models, UCX has found both of these caliper sets on vehicles spanning the 1995 and up range. As noted above, the calipers are interchangeable but the Tech must be aware of the pad/pad clip differences to insure proper installation.
