

FAQ

What are your grill inserts made from?

Our inserts are made from one piece of high grade aluminum.

What is installation process?

The install process is very easy. Each piece of aluminum is cut precisely to slide perfectly behind factory grille. There is no drilling or screws required.

Can inserts go through a car wash?

Yes. You can go through a car wash and also hand wash the inserts without causing any damage.

Do you only make grill inserts for Jee Wranglers?

Yes. As of now we are only making grill inserts for 2007- current Jeep Wrangler models. We hope to expand to other years and models in the near future.
