

BMW / Audi / Volkswagen Aluminum Engine/Trans Pans

Part# 24 15 2 333 903-PRM, 24 15 2 333 907-PRM, 24 11 8 612 901-PRM, 06K 103 600R-PRM

OEM Design

The molded plastic engine and transmission pans found on many late-model European cars often fail after minor impacts, and may contain irreplaceable integrated fluid filters.

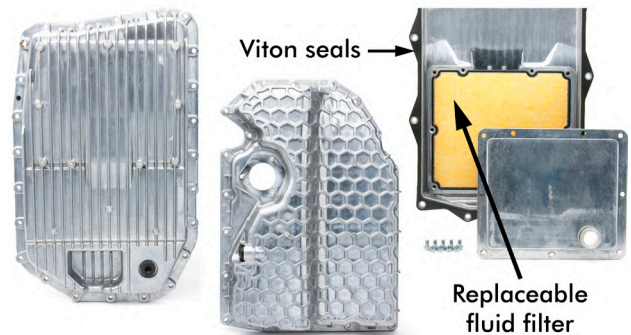

Problems

- Roadway debris strikes can fracture or puncture fragile plastic pans
- A leaking pan can result in engine or transmission oil starvation, costly internal damage, and emergency towing fees
- Filter element can't be replaced separately, requiring replacement of entire assembly

ÜRO Solution

ÜRO offers all-metal engine and transmission pans for popular BMW, Audi and Volkswagen models, which consist of sturdy aluminum housings and serviceable filter compartments.

Advantages

- Alloy aluminum pan resists debris impacts and is impervious to heat, motor oil and automatic transmission fluid
- Durable Viton seals for reliable sealing
- Replacement filter elements are readily available from ÜRO Parts
- Unlimited Mileage Lifetime Warranty

Vehicle Applications

- 2002-2008 5/6/7-Series or X5 with GA6HP26Z Automatic Transmission
- 2003-2008 3/5-Series, X5, or Z4 with GA6HP19Z Automatic Transmission
- 2010-2018 2/3/4/5/6-Series with GA8HP45Z or GA8HP70Z Automatic Transmission
- 2015-2016 Audi A3/S3 or VW GTI/Golf with 1.8L or 2.0L Engine
