

Aluminum Thermostat Housings

Part# AJ82217KIT-PRM, 11 53 1 720 173-PRM, 11 53 1 722 531-PRM,
11 53 1 740 478-PRM, 11 53 7 512 733-PRM, 12 790 474-PRM

OEM Design

The plastic thermostat housings commonly used on many late model European cars are prone to failure from repeated thermal cycles.

Problems

- Engine heat cycling and exposure to motor oil, grease or transmission fluid can weaken plastic thermostat housings
- Cooling system pressure eventually cracks or breaks plastic housings, resulting in coolant leaks and dangerous engine overheating

ÜRO Solution

ÜRO Parts offers several premium aluminum thermostat housings for popular BMW, Mini, Jaguar, and Saab models, which provide a more robust part with a lifetime warranty.

Advantages

- Precision-cast all-metal construction
- Aluminum material is impervious to engine heat, motor oil and ATF
- Quality EPDM seals (when included with OEM housing)
- Lifetime warranty

Vehicle Applications

1998-2003 Jaguar Vanden Plas, XJ8, XJR, XK8 & XKR
1993-1996 BMW E34, 1991-1999 E36, 1997-1999 E39
2002-2008 Mini Cooper S
2003-2011 Saab 9-3
