

BMW Aluminum Pulleys

Part# 11 51 1 436 590-PRM, 11 51 1 730 554-PRM, 11 51 1 739 527-PRM,
11 51 1 742 045-PRM, 11 51 7 504 077-PRM, 32 42 1 740 858-PRM

OEM Design

OEM pulleys are made of injection molded plastic. This plastic wears, gets brittle over time, and cracks or breaks.

Problems

- Cracked pulleys can flex, causing noise and belt wear and misalignment issues
- Flying sections of broken pulleys can puncture radiator or damage fragile AC system components
- Pulley failure can strand vehicle owner at inopportune times or in desolate locations

ÜRO Solution

ÜRO Parts offers CNC-machined aluminum water pump and power steering pulleys, which replace failure-prone plastic OE and aftermarket pulleys.

Advantages

- 100% aluminum construction maximizes pulley strength to weight ratio
- Precision-machined for proper balance and smooth operation
- Attractive and durable finish
- Lifetime Warranty

Vehicle Applications

1991 - 2010 BMW 3/5/6/7/8-Series, X5, Z3, and Z4
