

Porsche Convertible Top Push Rod Ball Cup

Part# 986 561 279 02-PRM

OEM Design

The OE Porsche Boxster convertible top actuating pushrod is made with a plastic ball cup which wears and breaks, rendering the top inoperable. The only OE solution is to replace the complete arm with another plastic-ended rod.

Problems

- Plastic cup becomes brittle with time and seasonal heat and cold cycling
- A replacement cup is not available from OEM

ÜRO Solution

ÜRO Parts offers a Premium formed steel replacement ball cup so you don't have to purchase a complete arm. Simply unscrew the damaged plastic end and install the lifetime warranty ÜRO metal version for much less than the cost of a complete top arm.

Advantages

- Sturdy metal construction prevents future breakage
- Lifetime warranty

Vehicle Applications

1997-2012 Porsche Boxster
