CAS-TLC Cable Connection

**Radio***

BT45 Interface Module

TO RADIO
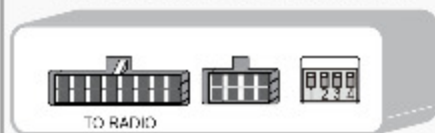

18 pin male

BT-TOY

CAS-TLC

1. Connect the BT-TOY cable to one of CAS-TLC cable's 12-pin male terminal
   - If your radio has an unoccupied 12-pin port then skip to step 4
2. Unplug the factory 12-pin cable from the radio
3. Plug the cable from step 2 into the CAS-TLC cable's 12-pin male terminal
4. Plug the CAS-TLC's 12-pin female terminal into the radio's 12-pin port
   - If your radio started with an unoccupied 12-pin port then one of the CAS-TLC's terminal will remain unoccupied
