

FAQs

Will the SL3b-L (or SL3b-T) affect my factory installed hands free system?

The answer is no. Most phones are able to connect to up to 10 Bluetooth devices at the same time. So, your phone will connect to the existing hands free system for phone calls and to SL3b-L (or SL3b-T) system for music streaming without interference.

Can I combine multiple units together?

Yes. You can combine SL3sat (T or L) with MML (T1 or L1), or SL3sat (T or L) with SL3b (L or T). This way you can get Satellite Radio with USB input, or Satellite Radio with Bluetooth streaming.

Will the SL3b-L (or SL3b-T) interfere with any of the factory equipment?

No, the functionality of all factory installed systems will be retained.

What level of sound quality should I expect from the SL3b-L (or SL3b-T)?

The SL3b-L (or SL3b-T) uses one of the best Bluetooth modules on the market, so sound quality is similar to Bluetooth streaming devices installed on new Toyota and Lexus models.
