VIKING LIFE-SAVING EQUIPMENT

- Protecting people and business

Welcome to the

Life-saving equipment is serious business

Choosing the right maritime safety equipment for protecting people and business is one of the most important tasks for any shipowner, fleet manager or offshore asset owner.

That's why, when it comes to maritime safety equipment, you need a partner that will be there for the long haul - and one that has the product range, the experience and the ability to competently serve you.

VIKING advantage

Local access to global knowledge

Each of our customers has their own, unique priorities and preferences. But with more than 55 years in the maritime industry, and serving several thousand customers from a wide variety of marine sectors both locally and globally, we already know a lot about the opportunities – and the challenges – you face.

Second-to-none global resources

To help you, we've put together a comprehensive list of everything you'll need in safety equipment. We've made sure it's easily available and supported wherever in the world you sail. This way, we always stand ready to help you make sound and future-proof investments in the best safety equipment and solutions for your particular needs.

VIKING solves the global safety servicing puzzle

Put our know-how to work for your business

Deciding on marine safety equipment and servicing plans is no easy task. That's why it's best to talk to someone who has every piece of the puzzle.

Today, VIKING offers the widest choice of fixed price safety solutions and product packages on the market.

We already manage 1000 flexible safety servicing agreements for shipowners with some of the largest fleets in the world.

To find out more, contact your local VIKING branch office.

Remove the ups and downs of **port-to-port procurement** of your safety products

Current cost fluctuations from one port to another versus a VIKING Global Safety Product Agreement.

A VIKING Global Safety Product Agreement ensures easy, instant availability of more than 50 products in pre-determined ports at fixed prices, consistent quality and full compliance.

The hidden costs of port-to-port procurement

Anyone whose vessels sail among multiple ports is familiar with the problem: A routine purchase decision is made to replace pyrotechnics, an EEBD or other item needed to ensure safety – and safety rules compliance – on board a vessel. While the item itself may only be a modest expense, its true cost also includes the time and resources it takes to procure it and deliver it to the vessel.

Over a period of time, these hidden costs can inflate your total safety equipment investment. Worse still, varying local conditions can mean you have to buy products whose pricing, quality and compliance fluctuates widely from port to port.

All the advantages of centralized procurement with dependable, local availability

A VIKING Global Safety Product Agreement solves these problems by ensuring your vessels have global access to more than 50 products in pre-determined ports at annually fixed prices, consistent quality and full compliance.

And to ease administration, we've included single-point-of-contact management as well as easily accessible reports that provide an overview of key procurement data.

What you need.

VIKING offers a long, multi-brand list of marine and occupational safety equipment – all at competitive prices.

Highly efficient shipping operations carefully specify the types of equipment that make the best business sense for their fleet – and which ensure proper protection for crew and passengers.

Working with local marine suppliers to match these specifications takes time and effort. And you can't be sure a similar product is available in terms of quality, compliance or price.

With a VIKING Global Safety Product Agreement, you can get exactly the products and brands you need at pre-determined annual prices.

Where you need it.

VIKING's global representation and worldwide stockpoints give your vessels convenient access to quality safety products in key ports.

We'll work with you to define specific ports and products from our list of most frequently used ports,, creating an optimal solution for your needs.

And we're constantly expanding our distribution infrastructure to bring the advantages of a VIKING Global Safety Product Agreement to even more ports around the world.

When you need it.

A VIKING Global Safety Product Agreement speeds up the procurement process, making sure your vessels won't risk being delayed in port while waiting for vital safety equipment to arrive.

VIKING is known around the world for its fast and flexible delivery. And because you'll be working with a single point of contact for all the equipment on your list, it's easy to get the latest status on product orders whenever you need to.

The **world-leader** in marine evacuation systems

VIKING LifeCraft

A revolutionary hybrid that combines the advantages of lifeboats and liferafts in a single solution.

The VIKING LifeCraft™ is a complete high-capacity evacuation solution for all weather conditions and evacuation heights.

The system consists of two main elements: The LifeCraft™ itself - a self-propelled inflatable vessel with four engines for a high degree of maneuverability and safety; and a storing and launching unit which is, either placed on deck or built in. Each system contains up to four LifeCraft™ vessels capable of evacuating 200 persons each - for a total capacity of 800 persons.

Today's larger and wider vessels mean that the number of passengers and the variation in trim height and list conditions can be enormous in a distress situation. Only a hugely flexible evacuation system can cope with such extremes.

Experience VIKING's wide range of evacuation systems on the following pages.

Marine Evacuation Systems by VIKING

VIKING marine evacuation systems (MES) are designed to evacuate passengers and crew as quickly and as safely as possible.

VIKING provides tailor made or standard marine evacuation systems to suit the individual customer's requirements.

The wide range of evacuation chutes, minichutes and slides means that VIKING is unique in providing evacuation systems to suit every type of vessel.

VIKING Evacuation Dual Chute (VEDC)

The evacuation dual chute, VEDC, is VIKING's highest capacity chute system with an evacuation capacity of 908 people in 30 minutes. It is combined with 153 person liferafts for safe, rapid evacuation from large passenger carrying vessels.

This unique design combines the highest evacuation capacity with discreet, compact and self-contained design for maximum safety and relatively little deck disruption.

Each VEDC system contains two 153 person liferafts. Capacity can be increased to suit the exact ship requirements with additional drop liferafts.

EP Patent No. 2029239B1 - Patent Pending, NO
US Patent No. 8312967B2
EP Patent No. 2076316B1

VIKING Evacuation MiniChute (VEMC)

This system can be used by vessels with embarkation heights from 5-20 m.

Although it was originally designed for small and medium sized vessels, its flexible design means that it can also be used for larger vessels.

The MiniChute has a pre-incorporated 101 person liferaft and can evacuate 582 people in 30 minutes.

EP Patent No. 1490261B2
US Patent No. 7159527B2

VIKING Evacuation Slide (VES)

The slide is a stable, efficient dry-shod evacuation system that can evacuate over 657 people in 30 minutes. It can be tailor-made to suit all types of vessels and is available with self-righting 25, 51 or 101 person liferaft combinations.

The 30° angle between slide and ship absorbs the movement of the sea and means that the system can be installed at extreme forward and aft positions. The slide is fitted with lines that allow for access up the slide, allowing it to also function as a means of rescue.

SOLAS liferaft system with slide (VELS+SMS)

This MiniSlide system is designed for low embarkation vessels with independent slide and liferaft. The system requires only one crew member to operate and oversee evacuation.

The new brake cushion system gives evacuees a clear stopping point at the bottom of the slide and a soft stop.

The MiniSlide system has a 153 person liferaft, available with or without canopy to suit both open sea and protected waters. The systems can evacuate 501 people in 30 minutes and 303 people in 17 minutes and 40 seconds.

EP Patent No.1790565B1 - NO Patent No. 330482B1

VIKING Automatic Slide (VAS)

VIKING has developed a 153 person open reversible liferaft and minislide system packed into a single aluminum stowage box. The real magic of this system lies in its one-button, one-person release and operation.

The VAS system is designed and certified for vessels on domestic voyages such as ferries sailing in protected waters. It enables crew to evacuate up to 153 people in one go and is designed for evacuation heights between 1.5 - 3.65 m.

The VAS system is very easy to install. It comes in a box that is placed flush with the ship side, bolted to the deck and ready to go. No bowsing lines or welded connection points on the ship side are necessary.

VIKING Evacuation Mini Slide (VEMS)

This system is designed for small vessels operating in any sea condition.
It is available with either a 101 person open reversible liferaft for vessels operating in sheltered waters or a SOLAS compliant 101 person self-righting canopied liferaft for vessels operating at sea.

It is packed in a container the size of a standard liferaft container, simple to operate and fully operational within 2 minutes. The VEMS can evacuate 303 people in 17 minutes and 40 seconds and 501 people in 30 minutes.

VIKING Evacuation Chute (VEC)

The telescopic nature of the evacuation chute reinforced with aramid ensures a safe descent path and compensates for ship and sea movements so that evacuation is not obstructed. This system has the additional advantage of protecting evacuees from environmental hazards such as severe weather conditions during evacuation and is fitted with a protective cover.

The system has two or three pre-incorporated 101 person liferafts for ease of operation.

It is designed for installation heights of 5-20 m and has an evacuation capacity of 565 people in 30 minutes.

Davit-launchable liferafts (DKF, DKFS)

Davit launched liferafts are designed to be inflated and boarded at deck level, and then lowered into the water. They are available as selfrighting canopied liferafts or standard canopied liferafts.

They are designed to carry 12, 25, 35 or 39 persons and are an effective means of dry-shod evacuation and can either be an alternative to chute or slide systems or a supplement.

Throw-overboard liferafts

Throw overboard liferafts are designed to be dropped overboard in their container and inflated in the water.

Self-righting canopied rafts are available in four sizes; 25, 51, 101 and 153 persons. Standard canopied rafts are available in eight sizes; 6, 8, 10, 12, 16, 20, 25 and 35 persons. Open reversible liferafts, for use in sheltered waters are available for: 6, 12, 20, 25, 51, 101 and 153 persons.

Liferafts with capacities of 25 and above can be used as supplementary liferafts to all VIKING marine evacuation systems.

Direct boarding liferafts ((DKS, DKR, IBA)

Direct boarding liferafts are typically used on-board small passenger ferries. They are available either as open reversible large capacity liferafts or as self-righting canopied liferafts.

Both types are available in 25, 51, 101, and 153 person sizes.

They are mounted on racks on-board the ship and normally released from their cradles with a remote release system. They are then bowsed to the ship for direct evacuation from the deck to the liferaft.

VIKING Undertun

Designed for small ferries and high speed crafts and is approved for evacuation heights up to 2.5 m from waterline.

It is a lightweight aluminium system that is easy to install and easy to operate.
The system requires only one person to operate and can also be operated from the vessel bridge.

This system is also compact, with a small built-in size and is available with self-righting, canopied liferafts in sizes 39 or 50 persons, or with an open reversible liferaft for 50 persons.

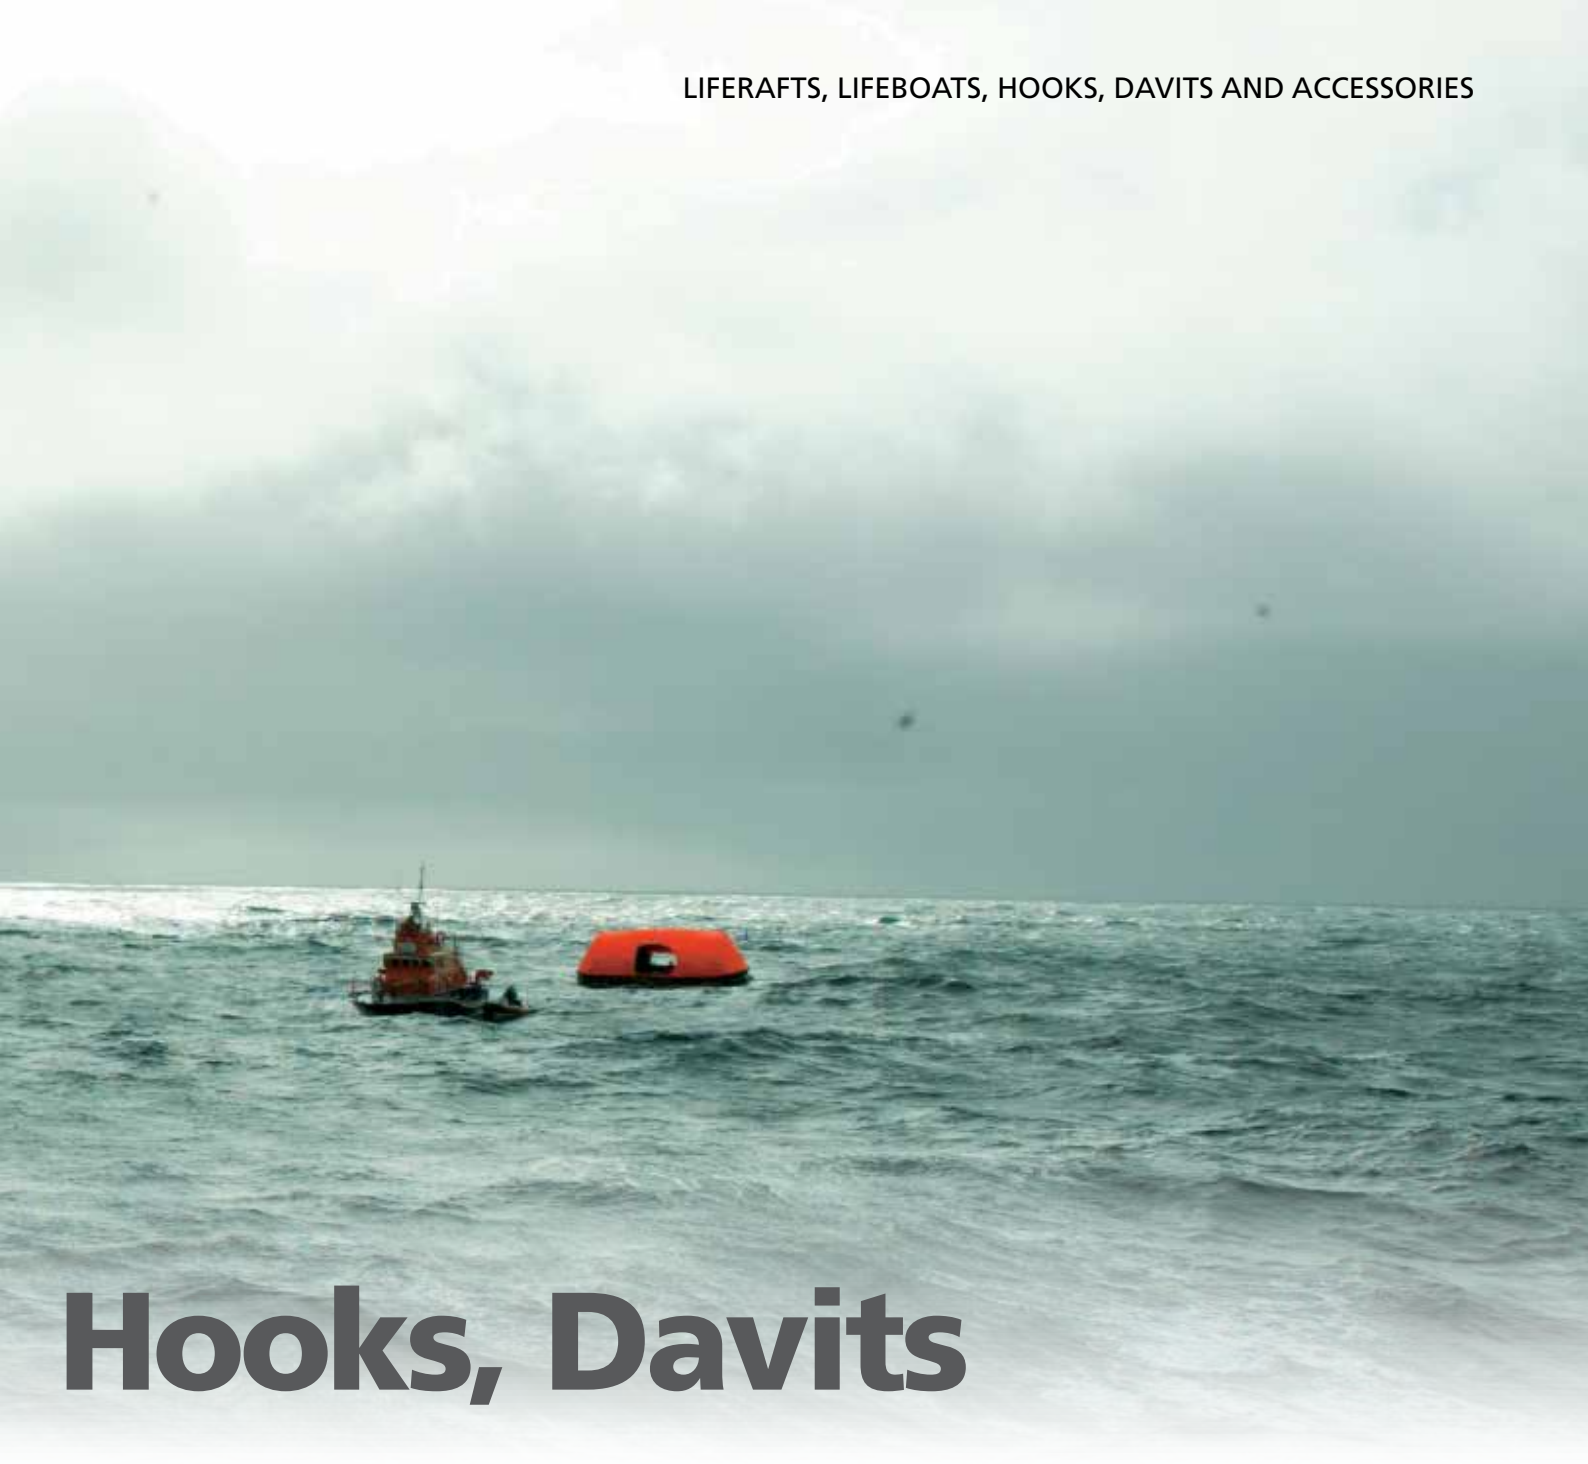

Patent Pending, CN
EP Patent No. 2714502B1
US Patent No. 9067656B2

Liferafts, Lifeboats, and Accessories

VIKING liferafts are designed in accordance with SOLAS Chapter lll and LSA Code requirements, and are MED, RMRS, Canadian Coast Guard and AMSA approved.

Our wide range of throw-overboard and davit-launchable liferafts are available in a standard version and a top of the line automatically self-righting version with storage heights of up to 60 m. VIKING also supplies cradles, hooks, davits, racks and ramps.

Hooks, Davits

The proven self-righting liferafts ensure that no matter how a liferaft lands in the water, it will always right itself ready for boarding. Liferafts can also be equipped with a hydrostatic release unit so they inflate automatically if they have not been released manually. VIKING liferafts are subjected to rough sea trials, wind velocity tests at forces of 30 m per second and deployed at extremely low temperatures.

For lifeboats, VIKING offers the Nadiro Drop-in-Ball™ hook system, a unique and patented solution that minimizes the risks associated with lifeboat operations. It is available in three versions covering lifeboat capacities up to 150 people and can be fitted or retrofitted on most makes of lifeboats and fast rescue craft.

Liferafts and Accessories

VIKING Throw-overboard Liferaft

- Type VIKING DK+
- Strong durability with an expected lifespan of 15-20 years
- Exceptionally stable even in extremely rough seas. Can be deployed at temperatures as low as -30˚C
- Two individual buoyancy chambers, each carrying capacity weight, so a puncture in one tube will not cause destabilisation
- Sizes: 6-39 persons

VARIANTS	
L006D00	6 person throw-overboard liferaft
L008D00	8 person throw-overboard liferaft
L010D00	10 person throw-overboard liferaft
L012D00	12 person throw-overboard liferaft
L016D00	16 person throw-overboard liferaft
L020D00	20 person throw-overboard liferaft
L025D00	25 person throw-overboard liferaft
L025DS0	25 person self-righting throw-overboard liferaft
L035D00	35 person throw-overboard liferaft
L039DS0	39 person self-righting throw-overboard liferaft

VIKING Davit-launchable Liferaft

- Type VIKING DKF+
- High durability with an expected lifespan of 15-20 years
- Designed to be inflated on deck level and while connected to the davit lowered to water level
- Provides safe and effective means of dry-shod evacuation and is suitable for all types of vessels, regardless of deck height or hull shape
- Sizes: 12-39 persons

VARIANTS	
L012DF00	12 person davit-launchable liferaft
L016DF00	16 person davit-launchable liferaft

Open Reversible Liferaft/Inflatable Buoyant Apparatus

- Type VIKING DKR / VIKING IBA
- Open reversible liferaft type mainly used for coastal and inland waters. The floor is placed in between the two buoyancy chambers and a boarding ramp is mounted on each tube making the liferaft fully reversible
- The open reversible liferaft is not a SOLAS approved solution but is approved according to local authorities and flag states
- The DKR liferaft are available in standard round rigid fibreglass container (all sizes) or in low profile fibreglass containers (up to and including the 50 DKR)

VARIANTS	
12-150 PERSON	DKR
6-150 PERSON	IBA, USCG approved
25, 50 PERSON	RDV, TC Canada approved

Polar Liferaft

VIKING was the first to supply a liferaft designed and tested for Polar conditions

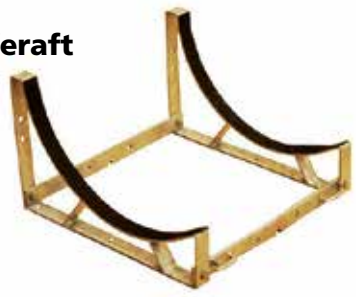

- Fully functional at temperatures as low as -50°C
- Efficient heater system ensures that the liferaft always inflates
- IP68 certified for use in blast proof areas

According to IMO Polar guidelines and Russian winterization regulations.
Certified by DNV, TC Canada, RMRS and USCG.
VIKING Polar Liferaft has the following patents:
DK Patent No. 176716B1, CN Patent No. 101795934B
Patent Pending EP

VARIANTS	
-	6, 8,12,16,18, 20, 25 or 35 person throw-overboard Polar liferaft and type DK12,16, 20, 25 or 35 person davit-launchable Polar liferaft, type DKF
RELATED PRODUCTS

VIKING Nadiro Drop-In-Ball™ Hook System

The unique Drop-In-Ball™ hook system design minimises the risk associated with accidents during lifeboat operations.

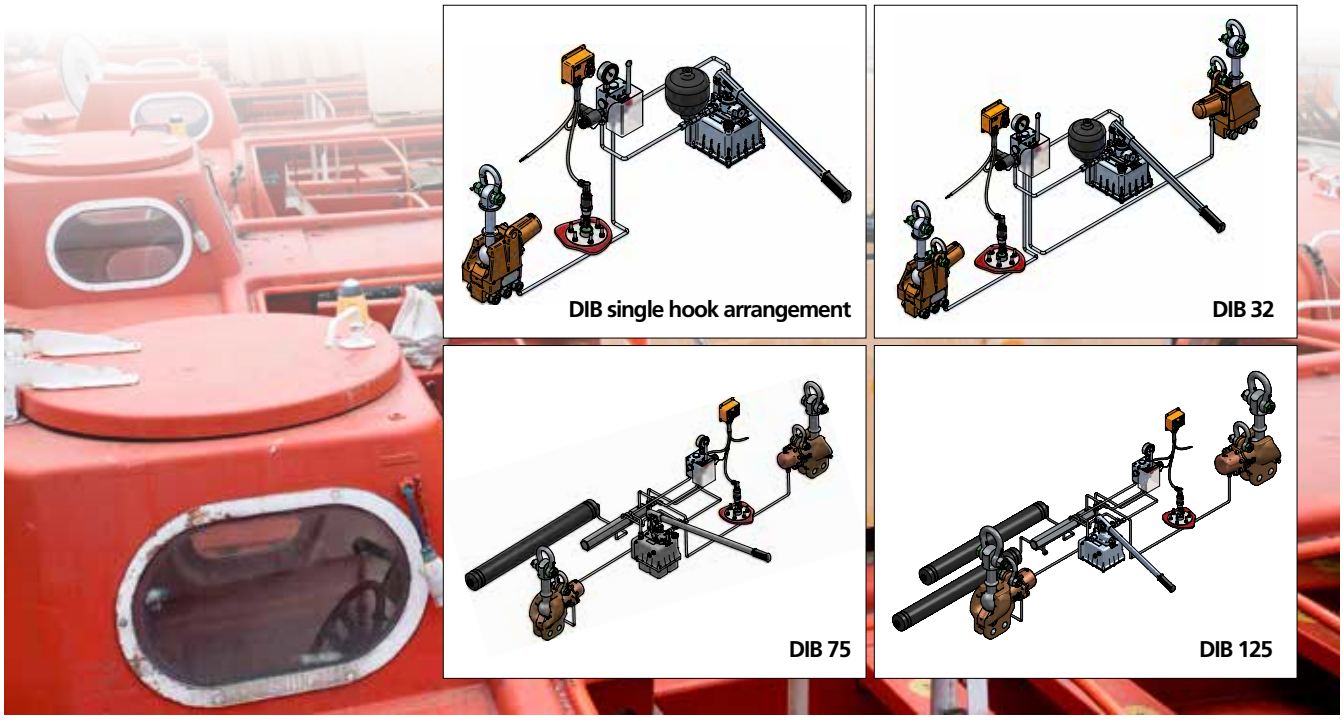

Key advantages

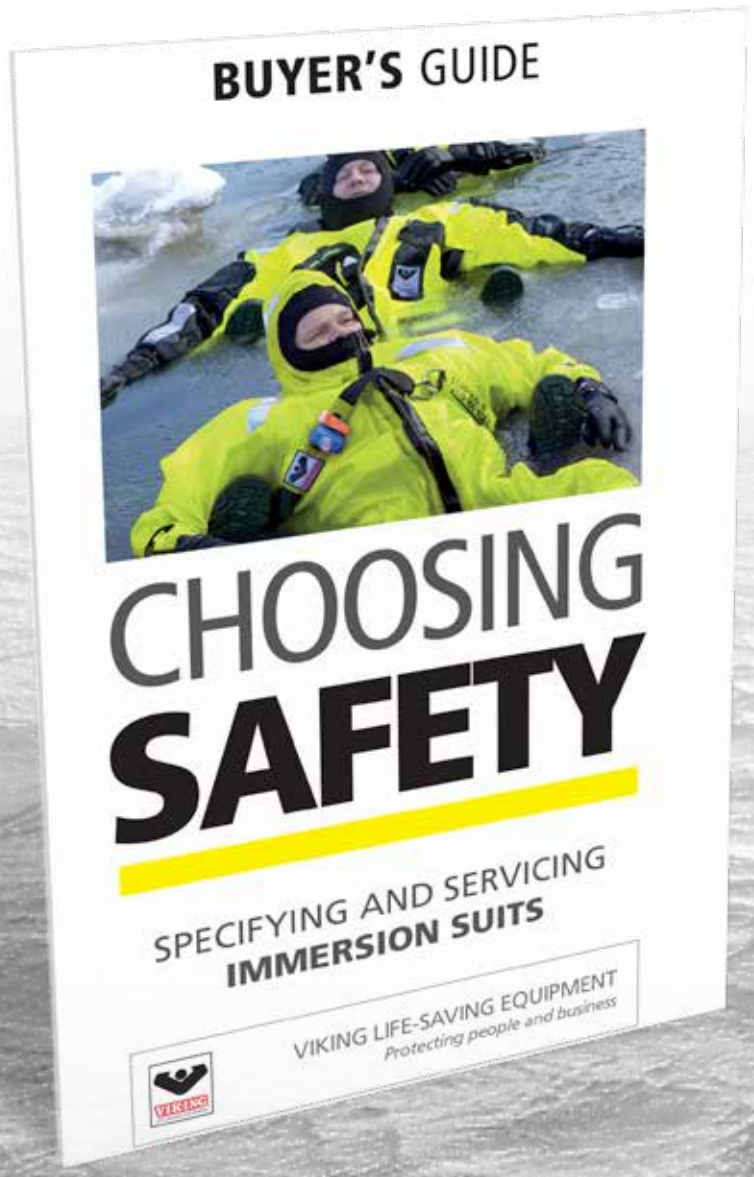

- Intuitive re-hooking with a safe and easy click-in system
- Can be fitted or retrofitted on lifeboats of all makes and capacities
- Hydraulic powered release
- Gravitational forces keep the hook closed
- Easy user interface inside the lifeboat
- Requires minimal crew and time to operate
- Back-up release mechanism ensures reliability
- Compliant with IMO regulations Res. MSC.320 (89) and the LSA Code
- Available as single and double fall hook system in 3.2 t, 7.5 t and 12.5 t hook capacity versions

	DIB 32	DIB 75	DIB 125
Hook capacity	3250 kg/hook	7635 kg/hook	12725 kg/hook

Get **the ultimate Buyer's Guide to immersion suits**

Whether you have a single vessel with a specific requirement or an entire fleet with a complex diversity of immersion suit needs, our Buyer's Guide will give you vital answers to important questions about the different types of materials, quality, durability, costs, delivery and servicing.

Making the right choice from the outset has long term impact on safety and economy.

Outstanding!

VIKING PPE products are the essential emergency clothing everyone wants to be seen in.

We're constantly in touch with the latest research on visibility at sea - and we have made it our business to bring outstanding developments to our customers.

The new high visibility yellow outer material, is aimed at making your chances of being noticed in even the most harsh sea conditions better than ever.

Personal Protective Equipment

VIKING offers a wide range of protective suits and lifejackets for all needs and weather conditions. We work closely with our customers around the globe to bring them the right solution for every challenge.

Immersion and Constant Wear Suits

Manufactured to withstand the harshest conditions, VIKING offers a wide range of immersion suits and constant wear suits including combined immersion and fire suits, constant wear suits for MOB/FRB boat crew and work suits. The latest models offer high quality, high visibility fabrics made of GORE-TEX®.

VIKING's neoprene and PU coated Nylon immersion suits are made to the highest standards one would expect from a world leading life-saving equipment manufacturer.

Lifejackets

VIKING's lifejackets combine comfort with maximum personal protection at sea. Choose from a wide range specially designed for commercial vessels, i.e. with extra buoyancy for situations where the user carries extra weight, such as equipment belts, or with heat-resistant covers for welders.

VIKING's multi-layer immersion suit concept provides the best performance possible with a PU coated Nylon outer fabric and a separate quilted thermal liner for insulation. This combination provides optimal dynamics between safety, thermal performance, durability and comfort – even in the most extreme situations.

- SOLAS approved solutions
- Quality materials in high visibility yellow
- Quilted thermal liners
- Fire retardant materials
- SOLAS reflective tape
- Oversized fit
- Extended zipper to side of face for the best comfort and minimal water ingress
- Loose gloves for easy donning of the suit and a lifejacket

Immersion Suits in PU Coated Nylon

VIKING PU Coated Nylon Immersion Suit

A premium immersion suit based on a multi-layer system with double thermal insulation to protect in the harshest conditions. Built-in buoyancy provides superior freeboard. Therefore, no lifejacket is required, which ensures the fastest donning time in an emergency.

- SOLAS approved multi-layer system
- Built-in buoyancy foam
- Extra thermal insulating liner
- Interior braces for adjustable sizing
- Detachable gloves for easy donning
- Lifting becket, buddy line and emergency light
- Air tight packing optional
- Weight 5 kg
- Dimensions: H 67 x W 50 x D 24 cm (packed)

ITEM NO.: PS5002

Neoprene
Immersion Suits

VIKING Neoprene immersion suits are made of high quality, durable fabrics.

Thermal protective performance is combined with high visibility colours to help increase your chance of survival in critical situations. Suits comply with SOLAS regulations and provide excellent thermal protection, flame retardancy together with a good, ergonomic fit.

Key features include extended zippers for comfort and minimal water ingress, detachable gloves to ease donning and reinforced anti-slip soles for durability and safety.

Optional integrated buoyancy, lifting beckets and packaging types are available.

Contact your local VIKING office for more information.

Anti-exposure Suits

VIKING's new generation, highly flexible anti-exposure and immersion suit for constant wear lets you work hard and stay safe under extreme maritime conditions.

The dual-approved, fitted and ergonomically enhanced suit is designed to perform across multiple marine applications - and beyond excellent protection, it offers great comfort, functionality and freedom of movement.

- Specifically designed for maritime work applications
- Available with (PS4191) or without (PS4190) ergonomically enhanced and fully integrated inflatable buoyancy
- SOLAS and ISO approved as anti-exposure and immersion suit
- Ideal for operations in both cold and warmer climates with a choice of detachable liner systems for 1 or 6 hour thermal protection against hypothermia and cold shock
- Made from waterproof and breathable GORE-TEX® PAZIFIK™ with stretchy fabric panels for enhanced ergonomics, comfort and freedom of movement
- Knees reinforced with CORDURA® and DuPont™ Kevlar®
- Choice of gloves and hood, attached rubber safety boots with steel caps and steel soles
- Lifting becket, buddy line, emergency light and whistle
- Host of design extras, i.e. print on back, embroidered patches etc.
- Enhanced fit and visual appearance
- High-visibility yellow enhances your chance of being spotted by SAR crews in case of a MOB emergency

Constant Wear Lifejackets

Our constant wear lifejackets are designed for tough marine and offshore work applications, combining superior in-water performance, durability and a comfortable, ergonomic design. They feature low-profile compact cover – in a choice of Cordura® or wipe clean fabrics for a durable, yet comfortable, exterior of the jacket. The uniquely designed buoyancy chamber with integrated cleat attachment system ensures best in-water performance and safer recovery.

VIKING Constant Wear Lifejacket

- Choice of Cordura® or wipe clean covers
- Options of 180N or 275N double compartment buoyancy chambers
- Belt-style waist with an integrated, padded back panel
- Optional sprayhood
- Option of Halkey Roberts® or Hammar® inflation systems
- Water-activated lifejacket light
- Front buckle systems (with or without D-ring)
- Dual crotch strap
- Integrated neck support/comfort padding
- Convenient re-packing solutions available

Your choice of features

VIKING makes it easy

Do you need extra buoyancy? Does your job require special cover material? You can even choose the buckle style, inflation system and add a light. Finally you have the option to add a sprayhood, a PLB (personal locator beacon) or both.

Custom features

- Buoyancy
- Cover material
- Closure (buckle style)
- Inflation system
- Light

Optional items

- Sprayhood
- PLB pocket
- PLB

All VIKING inflatable SOLAS lifejackets come with a whistle, reflective tape, lifting strap and crotch strap. The crotch strap ensures that the lifejacket stays in position, and helps maintain a correct flotation angle.

Custom features explained

Buoyancy

Symmetrical: The higher the Newton number (N), the higher the buoyancy. For general use, select 180N. For situations when extra weight is carried, select 275N.

Asymmetrical: As asymmetrical chambers offer faster and better turning capabilities, select a 275N asymmetrical where extra weight is carried, e.g. heavy tool belts.

Cover material

Cordura®: A heavy duty 500 denier Cordura® fabric provides super durability. This material is also used for body armour because of its superior abrasion and tear strength. Perfect for constant wear lifejackets used for working in tough marine environments.

Wipe clean: Repellent, yet soft to the touch and extremely hard wearing. After use simply wipe clean with a damp or wet cloth. Choose from four matte colours ranging from the brightest bright to black.

Typical use: Ideal for heavy industrial environments, e.g. offshore and fishing

Aluminium for welding: Durable aluminium coated Preox/Para-Aramid cover offers both radiant heat and spark resistance.

Typical use: Ideal for all severe heat environments, e.g. for welders and offshore personnel working in production areas.

Always approved

No matter how you design your VIKING inflatable lifejacket it always fulfils existing SOLAS requirements.

Example of 275N wipe clean lifejacket with snap lock "Salsa" closure and harness.

DACON

Man-over-board recovery systems

FOR ERRV, OFFSHORE WIND AND SAR VESSELS

Dacon Rescue Scoop

- Power-assisted method of recovering able or disabled persons from the sea
- Standard equipment on most Standby vessels in the North Sea and North Atlantic
- Provides a means of recovery in rough weather with limited risk for the crew

Man-over-board NORWEGIAN QUALITY Manufactured in Norway by Dacon AS recovery systems

Dacon Scrambling Nets

- Rigid, non-slip climbing aid that allows able persons to board quickly from the sea or FRC
- Optional fold-over installation frames suspend the nets 250 mm from the ship side to meet UKOOA requirements
- Hauling lines for assisted recovery of exhausted survivors unable to scramble to safety

Dacon Rescue Basket

- Efficient equipment in situations with multiple persons in distress
- Easy ”float in” entry into the basket
- Heavy duty materials for long service life
- Satisfies class & flag state requirements for ”temporary refuge in the sea”

New SOLAS regulation

Recovery of persons from the water SOLAS Chap. III Regulation 17-1

According to the SOLAS regulation, all vessels are required to have plans and procedures for recovery of persons from the water describing the equipment the vessel will use.

VIKING can help you find the most suitable solution for your vessel.

Polar Solutions

VIKING offers a full range of safety products specially designed for frozen waters and harsh arctic environments.

Severe winters can limit rescue operations. Fog makes evacuation by helicopter dangerous and winter ice makes the use of free fall lifeboats impossible.

Many safety products require special features to function reliably in extremely low temperatures. VIKING offers a full portfolio of products suitable for Polar conditions.

Heated Cabinets

- VIKING supplies a full range of heated cabinets
- Protected heater box keeps suits, lifejackets etc. from freezing or accumulating ice
- Various sizes and wattage is available
- Can be supplied for all cabinets
- ATEX approved

SOLAS Marine Fire Safety Package

There are specific SOLAS/MED requirements for marine fire-fighting as well as flag state approval requirements. VIKING can supply a full package of approved products as needed for your fleet.

COMPLIES WITH IMO REGULATION, SOLAS II-2/10

UHF Hand Held Radio
Item No.: 1063619
See page 104

Firefighter Hood
Item No.: PS383567
See page 60

Torch Light
Item No.: 1058219
See page 43

Compressor
Item No.: 1045777
See page 79

Fire Proof Safety Line
Item No.: 1042277
See page 60

Firefighter Helmet
Item No.: 1065914
See page 61

Visor for Firefighter Helmet
Item No.: 1054203
See page 61

Neck Protection for Firefighter Helmet
Item No.: 1024862
See page 61

Self-contained Breating Apparatus (SCBA) (Incl. cylinder)
Item No.: 1056036
See page 78

Spare Cylinder for SCBA
Item No.: 1045656
See page 79

Firefighter Waist Belt
Item No.: 1043103
See pag 61

Pouch for Firefighter Axe
Item No.: 1020780
See page 61

Firefighter Gloves
Item No.: 10179xx
See page 60

Short Firefighter Axe
Item No.: 1048027
See page 61

Long Handled Firefighter Axe
Item No.: 1017940
See page 61

Firefighter Suit
Item No.: PS6561
See page 57

Firefighter Boots
Item No.: S-5260360xx
See page 60

Firefighter Accessories

Firefighter Gloves

- Black leather gloves
- Waterproof and fire resistant
- Sizes: 7-12
- Weight: 366-422 g
- Dimensions:
  H 18 x W 33 x D 5 cm
  (packed size 7)

ITEM NO.: 10179XX

Fire Extinguishers

Safe and efficient fire fighting operations require the readiness of approved and effective fire-fighting equipment according to SOLAS regulations.

VIKING offers a complete range of highly efficient fire extinguishers for all types of fires.

For detailed information about the different fire classifications and the suitable agents please check to the right.

VIKING also supplies a range of suitable cabinets for portable extinguishers.
See the section on storage boxes on page 106.

Fire Classification A

Fires with solid substances mainly of organic nature, naturally causing glowing fires e.g. wood, paper, textiles, coals, some plastics. Extinguishing agent: powder, foam, water.

Fire Classification B

Fires of liquid substances or substances becoming liquid, e.g. petrol, fats, oils, varnishes, resins, tar, waxes and the majority of plastics. Extinguishing agent: powder, foam, CO_2.

Fire Classification C

Gas fires, e.g. methane, natural gas, hydrogen, propane. Extinguishing agent: powder.

Fire Classification D

Metal fires, e.g. magnesium, aluminium, sodium and their alloys. Extinguishing agent: powder

Fire Classification F

Fires involving deep fried oils and fats, e.g.: in restaurant kitchens etc. Extinguishing agent: water and additive

Portable Fire Extinguisher, A.B.S.

Fire Extinguisher, Foam

- Cartridge operated A.B.S.
- 9 L AFFF foam
- Suitable for fire classes A, B and F

ITEM NO.: 1038577

VARIANTS	
1061989	Fire Extinguisher, Foam, 6 L, Stored Pressure, Class ABF, A.B.S.
1060126	Fire Extinguisher, Foam, 9 L, Stored Pressure, Class ABF, A.B.S.

Breathing Apparatus

Face mask interface with mic and speaker.

Lapel mic PPT assembly C-C500. Variant depends on radio type.

Face mask with Sabrecom 2 communication system installed.

A hand-held radio can be integrated with the Scott SCBA using the Scott Sabrecom 2 interface. The interface varies depending on radio type and brand.

Self-Contained Breathing Apparatus Scott Safety, SIGMA-2

- Complete BA set incl. mask (Panaseal), backplate, harness and regulator, excl. cylinder (must be ordered separately)
- Can be used with steel or composite cylinders
- Can be equipped with an integrated radio communication unit
- Weight without cylinder: 3 kg
- Dimensions: H 600 x W 278 x D 200 mm

ITEM NO: 1056036

We make it easy to choose

VIKING offers the flexibility to choose the EEBD that best suits your needs! Contact your local VIKING representative for assistance today.

TIME IS UP!
Ocenco EEBDs purchased in 2002 will soon need replacing!

Ocenco M-20.2

If you prioritize a truly hassle-free EEBD with minimum handling, then the M-20.2 is the right choice.

It's the smallest, lightest and most compact EEBD on the market. And uniquely, the M-20.2 is maintenance-free throughout its 15-year lifetime.

The M-20.2 is included in your VIKING Global Safety Product Agreement (GSPA) for easy availability at globally fixed prices in key ports.

Or request delivery directly from a VIKING global stock point to avoid the hassle of dangerous goods transportation.

Scott Safety ELSA

Prefer to keep the up-front investment to a minimum, but don't want to sacrifice quality?

Then the competitive entry price of Scott Safety's air-pressured ELSA EBBD delivers exactly what you need.

The highly reliable ELSA has been in service for over 30 years. And, while a 5-year hydrostatic cylinder test is mandatory, service isn't required until year 10. If the need arises, ELSA gives you the breathing room to escape hazardous situations with confidence.

GLOBAL
SAFETY PRODUCT AGREEMENT
VIKING LIFE-SAVING EQUIPMENT

15 YEAR MAINTENANCE FREE

EEBD Escape Set, Ocenco M - 20.2

- No additional service charges such as service fees and costs related to hydrostatic testing
- Very low incidence of leakage compare to compressed air devices
- Completely water tight sealed case protects all of the components from mold, vermin, salt spray, etc.
- Can be worn on the belt during inspections or other work related situations
- Meets all national and international standards
- For one-time use only. The OCENCO training unit must be used for training exercises
- Solid track record since 2001

Communication

SOLAS regulations apply to all vessels over 300 gross tons engaged on international voyages, where a Global Maritime Distress Safety System (GMDSS) is required.

These safety systems require:

- EPIRB
- SART
- VHF
- Lifejacket lights
- MOB marker lights

VIKING offers a variety of options which comply with SOLAS GMDSS standards.

ACR GlobalFix™ GPS EPIRB, Float Free

- Professional grade GMDSS Cat-1 406 EPIRB
- Powerful 6.4 watt 406 MHz frequency
- 66 Channel GPS to pinpointing position
- Includes category 1 sea shelter and automatic
- Hydrostatic release (ACR HRU)
- 6 year battery life
- 5 year warranty on EPIRB (2 year on HRU)
- Requires programming with MMSI#

ITEM NO.: 1038878

New Regulation for Fire Fighting Packages

SOLAS REGULATION II - 2/10

A SOLAS amendment requires that ships built before 1st July 2014 carry "A minimum of two two-way portable radiotelephone apparatus for each fire party for fire-fighter's communication. Those two-way portable radiotelephone apparatus shall be of an explosion-proof type or intrinsically safe."

Make sure your fire fighting packages are up to date with explosion-proof radios!

ACR Personal Locator Beacon (PLB), ResQLink+

- Model 2881 ResQLink (TM)+
- 406 MHz and 121.5 MHz homing signal

The next generation in 24/7 onboard e-training and competency management

Now there's an effective onboard e-training system your crew can use to train at any time – whether they're at sea or on shore, online or offline. This unique system even lets you track, assess and schedule training any time and anywhere, too.

Our 24/7 onboard solution provides the most cost-effective training and real-time overview of crew certifications and training status including:

- **OODTP for ERRV**
- **STCW onboard refreshment**
- **Your own, fully customizable courses**

Signs and Posters

Mandatory, hazard, safety, fire, first aid and IMO signs and escape route marking are compulsory for commercial vessels. They must be clear, visible and approved by the IMO.

Signs are colour coded according to their purpose and must either be lit by low level emergency lighting or photo luminescent for at least 60 minutes after the termination of external light sources.

Multi-lingual signs and additional sizes are available upon request.

All signs are approved according to the IMO and are manufactured in high photo luminescent quality.

- from one point of contact

Liferafts

Certified liferaft servicing, including annual IMO-required servicing to the highest safety standards and fully manufacturer-approved. For especially fast turnaround, we offer fixed-price liferaft exchange.

Personal Protective Equipment (PPE)

Efficient servicing and repairs of suits and lifejackets. Optional equipment exchange and customised fleet solutions with optimal conditions.

Marine Fire

Supply, service and re-certification of a wide variety of extinguisher systems and other stationary or portable fire-fighting equipment.

Evacuation Systems

Certified servicing stations perform thorough servicing of marine evacuation systems when and where you need it.

ety servicing

Lifeboats, Hooks and Davits

Consolidated, multi-brand servicing in full compliance with applicable regulations, including annual or 5-year inspections.

For hook retrofits, we take care of everything from overhaul assessment to installation and performance testing.

Flexible, all-in-one servicing agreements

Given the amount of safety equipment on board that needs to be serviced, there are significant advantages to choosing one company that can do it all.

Streamline your operations with a VIKING Shipowner Agreement:

- Multiple brands
- Fixed prices
- Flexible contracts
- Financing
- Over 260 locations worldwide

Choose from…

- A comprehensive Shipowner Agreement
- Fixed-price Exchange (swap with freshly serviced products at pier)
- Managed Service (competitive day-to-day pricing).

…or find the right mix of servicing concepts across your fleet.

Let **VIKING's experts** manage your service

Service booking

- Keep focus on ship schedule
- Notifications on upcoming service
- Find appropriate service station
- Coordinate and book service with multiple partners

Follow up

- Evaluate performance
- Monitor invoices

Station monitoring

- Monitor servicing station performance
- Inspect stations

VIKING Managed Service

Global safety servicing of all products and brands from a local point of contact

VIKING's unique network makes it possible for us to cover all your servicing needs from a single point of contact at your local VIKING branch office. Servicing is carried out at a VIKING servicing station or at one of our carefully selected partners.

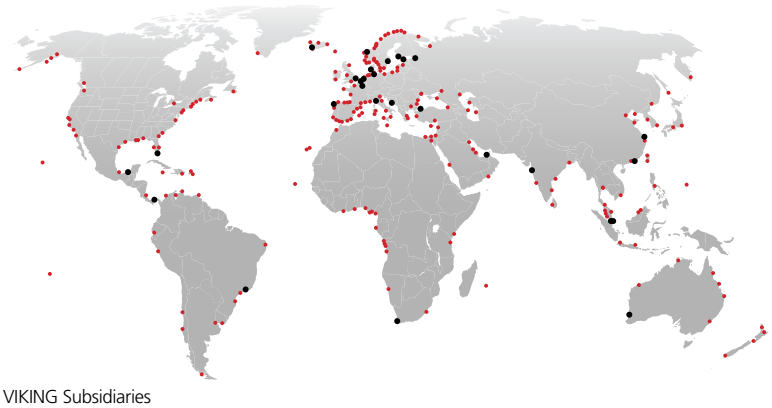

- Liferafts
- Lifeboats, hooks and davits
- Immersion suits and lifejackets
- Marine fire equipment
  Fire extinguisher, fixed systems, gas detection, EEBD, breathing apparatus
- Other lifesaving appliances

Convenient servicing of your safety equipment

VIKING offers several options to suit any fleet's particular needs including special global agreements to help manage fleet servicing needs effectively. To help keep servicing schedules, VIKING offers notifications at customer chosen times before service due dates.

Right quality, right price

Our dedicated planners arrange and book service at any location for consolidated servicing of your multi-brand safety equipment on board. We also perform service visits and ensure that you get quality servicing at the right price.

• VIKING Subsidiaries
• VIKING Network Total

Jasmin Puri, VIKING GERMANY, Customer Service Planner

Consistent service

"My German customers especially appreciate to hand over me the efficient planning and performance of all their safety equipment products, that needs to be serviced. They know with 100-percent confidence, that we are to meet their deadlines at the most cost-conscious and suitable ways.

Our customers also value us as partners, because we offer professional and competent consulting service and are always able to provide them with satisfactory solutions."

Evren Sahin, VIKING Turkey, Customer Service Planner

Turkish Shipowners can reach me 24/7

"Our customers choose us because we offer reliable global service planning and can get in touch with all other parts of the world in an instant."

Ailyn Gonzalez, VIKING Americas, Customer Service Planner

Smooth routine

"My North American customers love that they don't have to worry about managing their safety equipment service because they know that I am keeping an eye on things. I let them know when it's time to have equipment serviced and suggest the most convenient and cost-efficient way to consolidate servicing."

Liferaft Service

Quality service with attention to detail

Documentation

- Liferaft is received and registered
- Logbook in the liferaft is completed (proof that the liferaft has been opened and tested)
- Inspection is performed using VIKING approved inspection checklist
- Certificate of re-inspection is issued
- Full documentation for service is archived according to regulations
- Detailed invoice is issued

Service

- Liferaft is removed from the container and the inflation system dismounted
- Container shell is cleaned and fibreglass is repaired if needed
- Container is relabelled
- Liferaft is inspected inside and out
- Emergency pack is checked and items replaced if expired according to regulations
- Liferaft equipment is inspected and replaced if needed
- Cylinder operating head, valve, knife and release wire is inspected
- CO_2 cylinder is checked for correct content level
- Inflation systems and high pressure hoses are inspected
- Liferaft is deflated, repacked in the container and prepared for despatch

Testing

- Liferaft is inflated with compressed air and pressure tested including a 60 min. working pressure test of the lower buoyancy chamber, upper buoyancy chamber and arch chamber
- If the liferaft is equipped with an inflatable floor, this is pressure tested for 60 min.

Liferaft is subjected to specific tests at various intervals according to international regulations.

- Gas inflation test (GI) is conducted every 5 years using the liferaft's CO_2 cylinder to inflate the liferaft
- Necessary additional pressure test (NAP) at double the working pressure rate is conducted at 11 years end then annually thereafter
- Floor seam test (FS) is performed to check the seams of the internal floor and is conducted at 11 years and then annually thereafter

Lifeboats, Hooks and Davits

Cost-effective and convenient servicing

Correct maintenance of release gear requires knowledgeable service for optimal performance in emergency situations, to increase durability and limit lifetime costs.

Annual inspections can reduce maintenance costs in the long run and a properly trained crew can reduce the risk of casualties during evacuation.

Global network

VIKING offers consolidated servicing and inspection for all your safety equipment on board including service for lifeboats, release and recovery systems (LRRS). Our global network VIKING owned servicing stations can perform inspections according to IMO MSC.1/Circ. 1206/Rev.1.

As a quality manufacturer of marine safety equipment and an independent service provider of lifeboats, launching appliances and release gear service, we offer full service coverage across the world at all key locations/ports and fixed prices.

Marine Fire Service

Certified servicing of marine firefighting and fire safety equipment

The advantages of correct servicing

Making sure your equipment is correctly serviced is important for several reasons. The most obvious is that your marine fire equipment is essential for situations involving a fire and it must work immediately when you need it.

However, proper servicing is also a cost-efficient means of ensuring that you get the most out of your equipment. It can improve the durability and lower the risk of costly repairs in the long run.

Choosing the right servicing partner is just as important as choosing the right equipment.

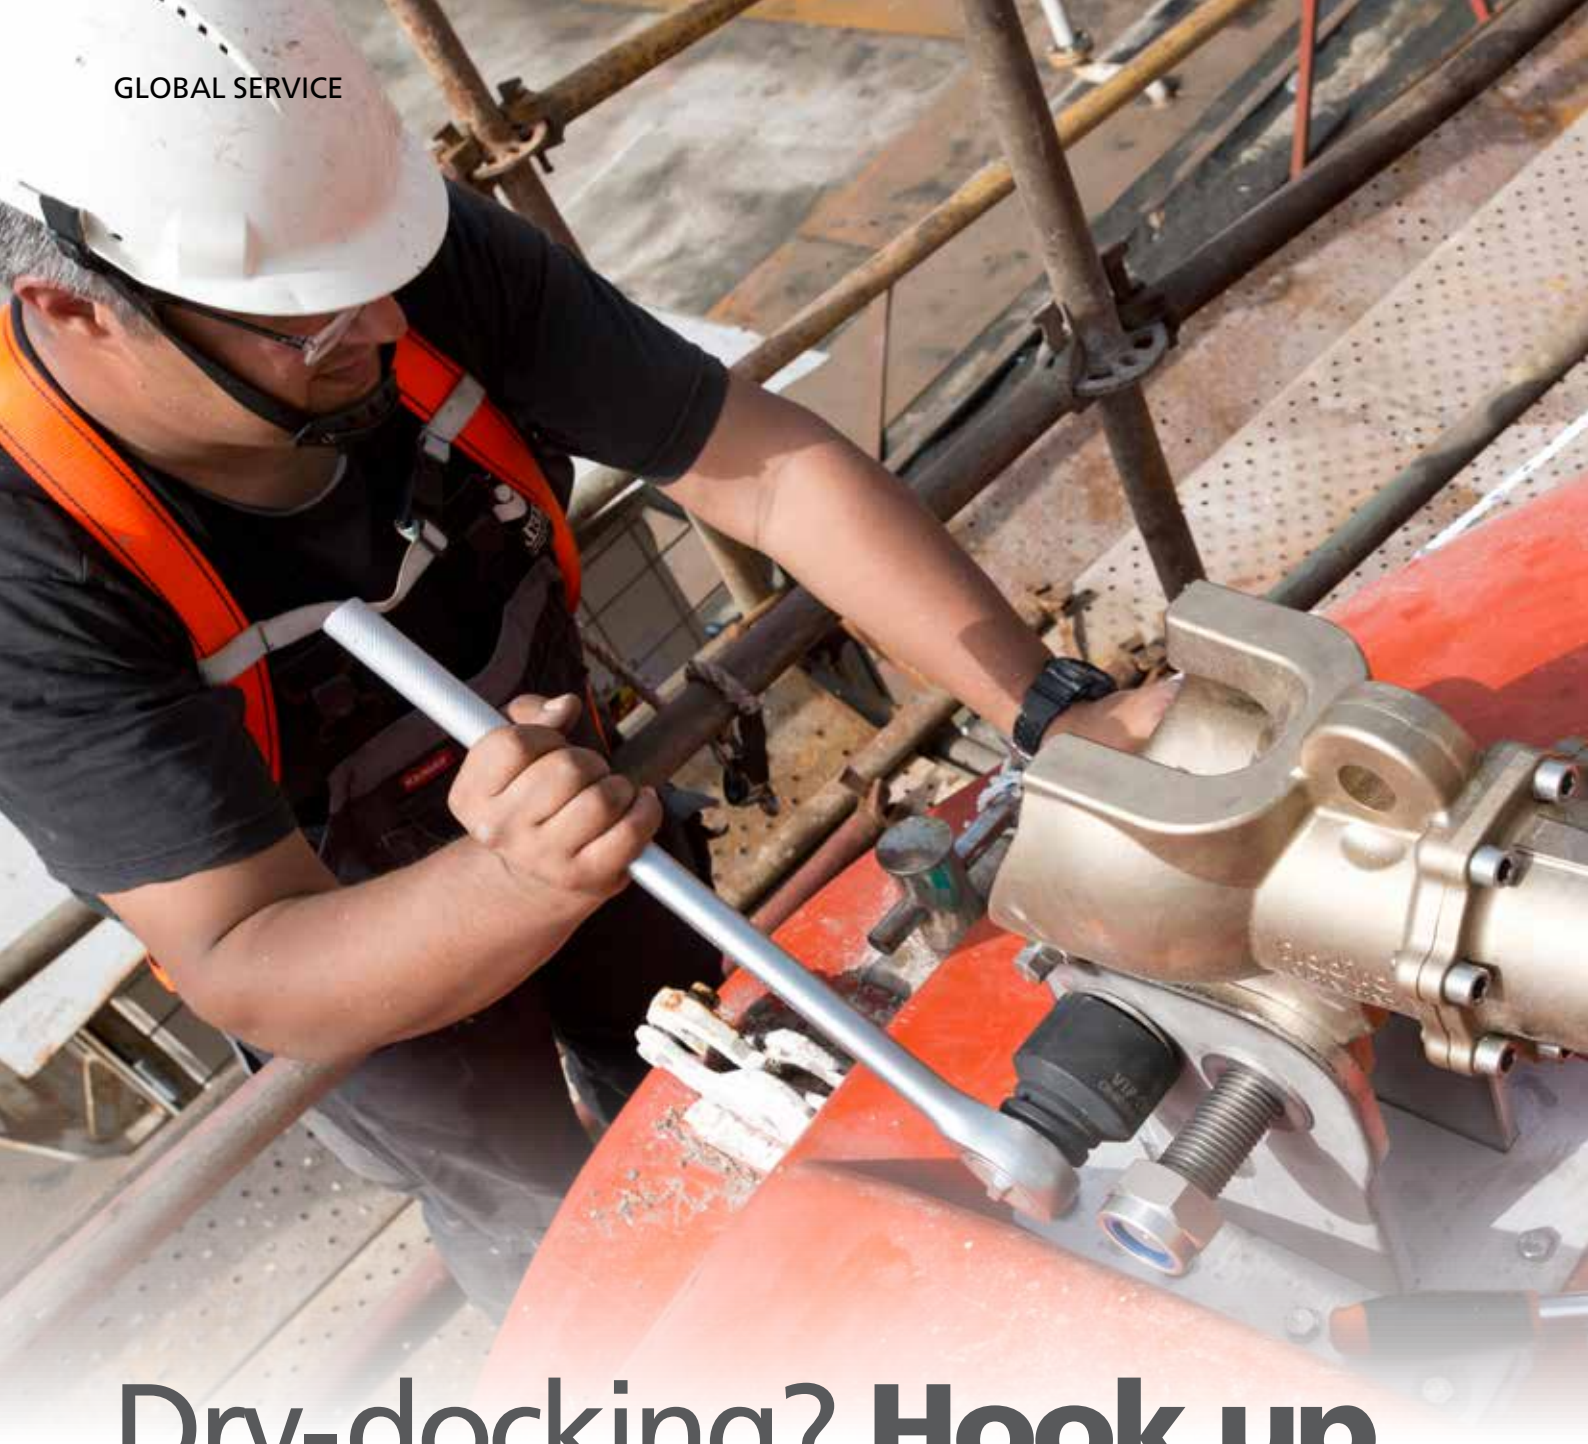

Experienced technicians and quality control make the difference

VIKING technicians are carefully selected professionals trained at the highest standards and we work together with the leading manufacturers of marine fire equipment.

Fixed price or Managed Service available

VIKING is class approved by the IACS and we service your marine fire equipment according to MSC/Circ.850, MSC.1/Circ.1318.

Dry-docking? **Hook up with VIKING Nadiro**

Fast, competitively priced installation wherever you are

Looking for a hook retrofit supplier that can deliver an ultra-safe, turnkey installation? Someone who can install almost anywhere in the world with 4 weeks notice or less? And need flexibility if your schedule should suddenly change?

Our patented VIKING Nadiro Drop-in-Ball™ can be fitted or retrofitted on most makes of lifeboats and fast rescue craft.

With few moving parts, it's light on procurement, installation, and service costs - and can be fully customized, too.

Mandatory changes

Lifeboat Release and Retrieval Systems (LRRS) are the focus of the IMO's MSC.1/Circ.1392 circular, that calls for major and mandatory improvements to safeguard lives both during lifeboat drills and in genuine evacuation emergencies at sea.

As a preferred service provider of leading LRRS manufacturers, we can offer full service coverage across the world at all key locations/ports and fixed prices.

Get on top of the new regulations

VIKING can take care of the entire replacement task:

- Managing the overhaul examination
- Planning and project management
- Physical replacement
- Performance testing

PPE Servicing

Flexible and cost-efficient options for smooth operations

VIKING performs high quality servicing of immersion suits and lifejackets at our dedicated stations all across the globe. You can choose between attractive day-to-day rates or customizable fixed price exchange agreements.

Our exchange agreements are an excellent option for shipowners and operators wanting to avoid the hassles and potential cost-fluctuations of PPE servicing. With an exchange agreement, immersion suits due for service are simply swapped with freshly serviced suits, directly at pier, for a fixed price per suits. No need to wait for servicing that can cause costly delays.

Immersion suit models available with the exchange agreement option include the top of the line PS5006 suit made of PU coated Nylon and the high quality Neoprene suit PS2014.

Evacuation Systems

Evacuation systems and other safety equipment need regular maintenance

Specially trained service engineers in the VIKING network offer the highest level of service with exclusive use of quality parts and equipment. Original VIKING certification and re-certification for servicing helps avoid potentially costly problems with classification surveyors.

Service agreements

VIKING Life-Saving Equipment offers service agreements for maintenance, re-certification of boarding platforms, liferafts etc. Choose a full service package or have VIKING tailor a solution to fit your needs.

Certification and re-certification

Servicing of evacuation systems is regulated by IMO SOLAS 1974, as amended, Chapter III, Regulation 20.8, and IMO Resolution A.761(18). Re-certification of system liferafts and boarding platforms must be carried out by certified personnel at a VIKING certified servicing station.

Products in this catalogue are sold by VIKING Life-Saving Equipment A/S, and manufactured by VIKING and others. Only those products explicitly named VIKING in the product name are manufactured by VIKING. Product specifications are subject to change without notice. Actual products or manufacturer may differ from those pictured in the catalogue. Some products may not always be available. Other products may only be available upon request.

One **safety** solution.
One **global** partner.

Expertise and convenience on a global scale

Fluctuating servicing costs for safety equipment make forecasting of safety equipment servicing more difficult than it needs to be.

On top of the servicing fees, it's the unexpected expenses for transportation and overtime at local servicing stations as well as all the hidden costs of the resources used to find servicing locations, make bookings, and handle administration and follow-up.

A VIKING Shipowner Agreement incorporates safety products, global servicing and financing in a variety of fixed price structures.

Whether you prefer standard service or equipment exchange, it's a long-term solution with a range of options to fit your operation.

Choose a solution that moves with your business. Clear and truly fixed prices simplify budgetting, and built-in flexibility such as transparent exit fees during the contract period accommodate changes in your fleet.

Talk to the experts

Contact your local VIKING branch office and hear why more shipowners and ship management companies choose to make an agreement with VIKING.
