CARGO HITCH RACK INSTALLATION INSTRUCTIONS

IMPORTANT: 2" Receiver hitch required to install and use this product.

1. Begin by bolting the mount plate and the cargo basket together. The mounts have pre-existing holes and mounting hardware is included in the kit.
2. If you do not already have a hitch pin, you will need to get one from an auto parts store. We recommend using a locking hitch pin to deter theft.
3. Install by sliding rack stinger into hitch and pin into place.

If you need further assistance installing your product, please contact us by email at techsupport@warriorproducts.com or call us at (888) 220-6861.
