**INSTALLATION INSTRUCTIONS:** 3840 FJ Cruiser Hi-Lift Mount

1. The installation of this kit is very straight forward. In your kit you will have two large outer mount plates, two smaller inner mount plates, some hardware and two linchpins.
2. You can locate this kit on either side of or on the rear portion of your FJ Cruiser factory roof rack.
3. Once you have decided where to locate the Hi-Lift jack, use the supplied hardware and sandwich the upper and lower main tubes of the factory rack between the large outer mount plate and smaller inner mount plate.

4. Set the Hi-Lift jack down into the recesses of the large outer mount plates and snap the linchpins through the uppermost holes to secure the jack. A lock (not provided) can also be utilized through the lower oblong holes on the bracket that index with the holes in the Hi-Lift jack.
5. Your installation is now complete.
