

VAN SOLUTIONS
FOR THE WAY YOU WORK™

EZGlide2™

INSTALLATION MANUAL

Models 2295-3-01 & 2297-3-01

ATTENTION: PLEASE READ AND UNDERSTAND ALL INSTRUCTIONS AND WARNINGS BEFORE ASSEMBLING, INSTALLING OR USING THIS PRODUCT.

CAUTION

Be safe - always wear protective eye wear to keep debris out of your eyes when installing WEATHER GUARD® Van Products

WARNING

Prior to drilling, check under vehicle for fuel, tanks, fuel lines, brake lines, electric wires, etc. To avoid cutting or puncturing them. Do not use Blind Fasteners in these areas.

Tools Needed

- THREADLOCKER COMPOUND
- 1/2" SOCKET AND/OR WRENCH
- 3/16" HEX KEY/DRIVER
- 1/4" HEX KEY/DRIVER
- 2X 9/16 SOCKET AND/OR WRENCH
- 7/16" SOCKET AND/OR WRENCH
- SAW RECOMMENDED FOR RAM PROMASTER 118" WHEELBASE
- DRILL WITH 21/64" DRILL BIT RECOMMENDED FOR RAM PROMASTER 118" WHEELBASE
- TORQUE SETTABLE DRIVER OR TORQUE WRENCH.
- 5/8" OPEN END WRENCH

BEFORE YOU BEGIN

The best time to install the EZGLIDE2™ dual drop-down ladder rack is when first installing the rack on the vehicle. After checking that your product is complete, follow along with the single drop-down installation instructions, adding the dual drop-down parts at the same time.

These instructions are written assuming that you are adding a dual-drop down kit to an existing installation.

5/16X1-1/4" BOLT

CURVED MOUNTING BRACKET

MOUNTING FOOT BOLT PLATE

STEP 1 - INSTALL VERTICAL TUBE AND DAMPER

Using the damper, damper rod and 1-e-clip, install the eyelet end of the damper to the damper rod using 1-e-clip. The damper comes with a preinstalled clip on the clevis end side. Remove clip, slide clevis end over the drive tube cam, and reinstall clip.

Using 2-5/16x2" screws, 2-1" spacers, 1-5/16" nylon lock nut, 1-5/16" washer, and 1-damper rod, install the vertical ladder stop to each drop down unit. The inner mounting point will use the 5/16" washer and nut, While the outer mounting point will use the damper rod for the 5/16x2" screw. It is recommended to use thread locking compound on the 5/16x2" screw that threads into the damper rod. Torque both the 5/16" nut and damper rod to 17 ft-lbs. Hold flat spots on damper rod with a 3/8" open end wrench while tightening screws.

Repeat with the other drop down unit.

STEP 2 - INSTALL LADDER HOOKS

Using 2-5/16x3" screws, 2-5/16" nuts, and 2-ladder hook supports, install the slide ladder hook on the slide down unit. The hook should be located according to the diagram but may be adjusted depending on ladder dimensions and user preference. Torque nuts to 17 ft-lbs.

Using 1-3/8x7/8" bolt, 1-3/8" nylon lock nut, and 2-3/8" washers install the fixed ladder hook to the drop down unit. The hook should be located according to the diagram, but may be adjusted depending on ladder dimensions and user preference. Torque nut to 30 ft-lbs.

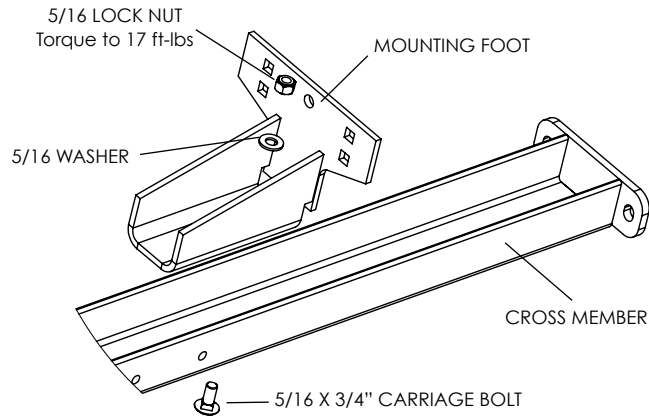

STEP 3 - MOUNT MOUNTING FEET TO CROSS MEMBERS

• FOR 2295-3-01, PROCEED TO STEP 5

Only use one carriage bolt, washer, and nut per mounting foot.

Using 1-5/16x3/4" carriage bolt, 1-5/16" washer, and 1-5/16" nylon lock nut per mounting foot, install two mounting feet per cross member. Please refer to the table and diagram for mounting foot location and orientation.

INSTALL MOUNTING FEET ACCORDING TO TABLE

MOUNTING FOOT DISTANCE		
VEHICLE	DIM "A"	DIM "B"
FORD TRANSIT	55-1/2"	6-3/4"
RAM PROMASTER	59-5/8"	4-5/8"
NISSAN	59-3/8"	4-13/16"
MERCEDES-BENZ SPRINTER	53-1/4"	7-7/8"

STEP 4 - INSTALL CURVED MOUNTING BRACKETS

Using 2-5/16x3/4" carriage bolt, 2-5/16" washer, and 2-5/16" nylon lock nut per mounting foot install a curved mounting bracket to each mounting foot. Torque nuts to 17 ft-lbs.

If using an impact driver to torque nuts, it is recommended that the carriage bolt orientation be reversed to engage the square cut outs in the mounting foot.

Most vehicle installations will benefit from having the lowest installed height with the mounting bracket lining up with the start of the curve on the curved mounting bracket. Due to vehicle roof curvatures some adjustment for final assembly height may be required after the crossmembers are installed on the roof.

STEP 5 - INSTALL DROP DOWN MECHANISMS TO CROSS MEMBERS

Installation will be easier if you can get more access between the rear cross member and van roof. Begin by loosening the 5/16-18" Lock Nuts holding the cross member to the mounting channels. Remove and retain hardware for re-assembly in Step 6.

Using 2-5/16x3/4" carriage bolt, 2-5/16" washer and 2-5/16" nylon lock nut per drop down mechanism, install each drop down mechanism to the cross members. The end of the bottom bracket on the drop down mechanism should line up with the end of the cross member. Torque nuts to 17 ft-lbs.

STEP 6 - INSTALL CENTER CONNECTING TUBE

• FOR 2297-3-01, PROCEED TO STEP 7

Rotate and position the connecting tube on the drive tube until all 4 mounting holes line up. Using 2-5/16x1-3/4" bolts, 4-5/16" washers, and 2-5/16" nuts, install the connecting tube. Torque 5/16 nuts to 17 ft-lbs.

Using 2-5/16x1-3/4" bolts, 4-5/16" washers, and 2-5/16" nuts, install the connecting tube on the front drive tube. Rotate and position the center connecting tube until all 4 mounting holes line up and then drop cross member onto stud plates. Torque 5/16 nuts to 17 ft-lbs.

STEP 7 - MOUNT CENTER CROSS MEMBERS TO VEHICLE

Slide two stud plates per mounting channel into mounting channel if not already done. If installing a dual setup with 3 cross members, 3 stud plates will be used per mounting channel. Using 2-5/16" washers, 2-5/16-18" nylon lock nuts, and 1 mounting foot bolt plate per mounting foot, install the rear cross member on the mounting channel. The cross member that has the slide down mechanism should be installed in the rear position.

The EZ GLIDE2 can be installed on either the street side or curb side of the van. Decide which side to install the drop-down before mounting it to the vehicle.

Locate the cross member approximately 1-3" from the end of the mounting channel and hand tighten each 5/16-18" nut. The 5/16-18" nuts will need to be kept loose until step 7 is complete.

STEP 8 - INSTALL CENTER CONNECTING TUBE

The 2295-3-01 ladder rack includes two connecting tubes. Use the shorter connecting tube for 5' to 8' step ladders or extension ladders up to 16'. Use the longer connecting tube for 10' to 12' step ladders or 20' to 40' extension ladders.

Rotate and position the connecting tube on the drive tube until all 4 mounting holes line up. Using 2-5/16x1-3/4" bolts, 4-5/16" washers, and 2-5/16" nuts, install the connecting tube. Torque 5/16 nuts to 17 ft-lbs. Using 2-5/16x1-3/4" bolts, 4-5/16" washers, and 2-5/16" nuts, install the connecting tube on the front drive tube. Rotate and position the center connecting tube until all 4 mounting holes line up and then drop cross member onto stud plates. Torque 5/16 nuts to 17 ft-lbs.

STEP 9 - INSTALL REAR DRIVE TUBE

Using 2-5/16x1-3/4" bolts, 4-5/16" washers, and 2-5/16" nylon lock nuts, install the drive tube to the rear drop down mechanism. Rotate and position tube until all 4 mounting holes line up and torque nuts to 17 ft-lbs.

STEP 11 - POSITION AND SECURE LADDER RACK ASSEMBLY

Insert the handle into the rear coupler and ensure there is sufficient clearance between the back of the vehicle and the handle for full rotation. If more or less clearance is desired slide the rack forward or backwards in the mounting channels. Once the desired position is found, torque all 5/16-18" nuts to 17 ft-lbs to lock the position of the rack.

STEP 10 - INSTALL REAR COUPLING

Install the rear coupling to the drive tube using the coupling bushing and clevis pin. The coupling should be installed with the red cap on top and the open end pointing AWAY from the center of the van.

The rear coupling may fit too tightly when first assembled. If it sticks, rotate it a couple times until it moves freely.

**2295-3-01 & 2297-3-01 EZGLIDE2™ SERVICE PARTS**

PART NO	DESCRIPTION	FITS MODEL NUMBER
70500	REPLACEMENT BOLT KIT FOR MODEL 2291-3-01 EZGLIDE2™ DROP-DOWN VAN RACK	2291-3-01
