WeatherTech® BumpStep®

HITCH MOUNTED BUMPER PROTECTION

Instructions

- 1** Slide the 2" square portion of your BumpStep® into your 2" receiver with the grooved step surface facing upwards.

- 2** Align the BumpStep® to the deepest hole position allowed by your receiver.

- 3** Insert the WeatherTech® hitch pin (or any commercially available hitch pin) to secure your BumpStep® to the receiver.

Note: If your BumpStep® has been involved in an impact or accident it is important to have it inspected for cracks or fractures prior to placing any weight or loads upon it. Please send it to WeatherTech®, BumpStep® Inspection, 1 MacNeil Court, Bolingbrook, IL 60440 and we will be happy to inspect it and advise you if it needs to be replaced.

Fully warranted to the original owner against defects in materials and workmanship for the lifetime of the product and specifically excludes damage caused by impacts, damage from car wash chemicals, etc.
