CupCoffee

CupCoffee

4" Coaster

StickySleeve™

Separator
Tool

Installation Instructions

1
CupCoffee comes with several base cups to perfectly fit your vehicle's cup holder.

2
To separate your base cups, align the separator tool with the hole on the bottom of each cup. Ensure only one opening on the bottom is visible at a time.

3
Push down on the tool to pop each cup until you find the right fit.

4
For extra stability, add StickySleeve. Simply stretch it over the appropriate base cup, far enough up the cup to have the StickySleeve appear just above the top of your cup holder.

5
Insert your CupCoffee into your cup holder, and then slide your 14 oz. tumbler into CupCoffee. Place tumbler handle in specially-designed side opening.

We've included a 4" Coaster inside your CupCoffee for increased security and to make cleanup easy. Interested in more coasters?
