			85350*

Plug wiring adapter into tow vehicle side connector to allow electrical connections between 7-way Blade Receptacle with variety of the trailer Plugs.

NOTE:

Wiring Adapters equipped with the built-in LED circuit testers will confirm that each connection is operating properly. Refer to the LED lights diagram shown.

INSTANT SWITCH INSTRUCTIONS *:

1. Determine which circuit is located on the center pin of the 6-PIN Trailer Connector (either BRAKE or Auxiliary).
2. Slide switch on bottom of Adapter to match with the trailer Center Pin function.
3. Test connections to be sure all circuits are connected properly before towing.

WARNING

All connections must be complete to function properly. Test and verify installation with a test light, circuit tester or trailer once installed.

WARNING

Overloading circuit can cause fires. **DO NOT** exceed lower of towing manufacturer rating or:

- Max. Right Turn, Left Turn, Stop, & Tail Light Circuits: (7.5 amps)
- Max. (+) Battery, Reverse, and Electric Brake Circuits: (30 amps)

Read vehicle's owners manual & instruction sheet for additional information. Additional fusing maybe required.
