PROCEDURE

1. Remove contents from box, verify if all parts listed are present and free from damage.

Carefully read and understand all instructions before attempting installation.

Failure to identify damage before installation could lead to a rejection of any claim.

2. Starting on the driver side, remove the rubber plugs located on the rocker panel at each mounting location. See **Figure 1**.

3. **For models with threaded holes:** At each bracket mounting location on the rocker panel there should be a welded factory nut.

Figure 1

4. Locate (1) Mounting Bracket (Item 3) and loosely secure it to the rocker panel using the provided hardware: (2) M8 hex head bolt, (2) M8 flat washer, and (2) M8 lock washer. See **Figure 3**. (Use SEMS hardware)

5. Repeat **Step 4** for all remaining bracket mounting locations. See **Figure 16**.
