

# Backup Cameras

## How do I pair my backup camera to the monitor?

Make sure you have charged your camera for at least 4 hours using the USB charging port before attempting to pair the unit. Once that is complete you can follow the steps below:

1. First, unplug the solar panels from the camera
2. Make sure the camera and monitor are near each other
3. Apply power to the monitor
4. Touch the menu button on the monitor, then use the arrow keys to highlight "setup"
5. Touch the "wake up" button to select "setup"
6. Select "pairing" by pressing the "wakeup" button
7. When pairing appears on the monitor, plug the solar panels back into the camera

This completes the pairing process and the video will appear on the screen.

## How do I turn the backup assist lines on/off?

With an image on the display, press and hold the MFU button on the far-left side (it looks like a person falling/pointing down) for 3 seconds then release. This will turn the backup assist lines on or off.

## Is there a way to make my display stay on for more than 30 seconds?

Currently there is not an option for more than 30 seconds at a time. To turn the display back on, touch the MFU button on the far-left side of the bottom of the display, looks like a person falling/ arrow pointing down. This will bring back the display for another 30 seconds.

## My display went blank how do I get the picture back?

Touch the MFU button on the far-left side of the bottom of the display, looks like a person falling/ arrow pointing down. This will bring back the display for another 30 seconds.

## There is nothing showing on my monitor. What do I do?

If nothing is showing on the monitor, the monitor and the unit are likely not paired or not paired correctly.

To pair the unit, follow these steps:

1. Charge the camera before use
  - Connect the supplied USB cord to the micro USB port of the camera assembly.
  - Plug the USB cable into any standard USB charger with an output rating of 500ma or higher.
  - Charge 4 to 5 hours.
2. Power the monitor on
3. Touch the menu button then the up or down arrow to select SETUP, then touch the enter button.
4. With PAIR icon selected, touch the enter button to begin the pair process
5. Connect both solar cell connections to turn on the camera
6. Pair OK will be displayed when the pairing process is completed.

The monitor should display what the camera is seeing.
