

## KPR068 PANHARD ROD

### REAR - ADJUSTABLE ASSEMBLY

**KPR068 - REAR PANHARD ROD** (on-car adjustable)  
Adjustable rear Panhard Rod for the S197 chassis Mustang replaces factory bar to keep the rear axle located in optimal position. Features an on-car adjustable turnbuckle design ideal for street and track use. Improves rear handling characteristic and improves traction.

Constructed of tubular DOM steel with specially designed forged ends for superior construction. Low Compliance MAX-C bushing provide optimal bushing performance with its reinforced tube. Top of the line Synthetic Elatsomer bushings provide a no squeek, zero maintenance performance backed by a class leading Lifetime Warranty.

Recommended use with KSB729 Rear Chassis Brace.

**PART NO. KPR068**

**LOCATION: REAR PANHARD ROD (ADJUSTABLE)**

MAKE	MODEL	YEAR	NOTES

## FORGED

**FORGED EYELET** specifically designed for on-off road abuse where load forces can be applied along different axis

**MALE - FEMALE PRESS FIT ASSEMBLY** provides a superior method of assembly to traditional designs that cut eyelet out of regular steel tube welded to rounded tube end.

**BEVELED BASE** allows for increased surface area for weld penetration and cleaner final fit and finish.
